

#### **HUMBOLDT BAY MUNICIPAL WATER DISTRICT**

#### **Board of Directors Meeting**

January 2017

Ruth Lake 1-4-2017

# Minutes

#### HUMBOLDT BAY MUNICIPAL WATER DISTRICT SECTION

828 7th Street, Eureka

#### Agenda for Meeting of Board of Directors

December 8, 2016, 9:00 a.m.

#### A. ROLL CALL

President Hecathorn called the meeting to order at 9:01 a.m. Director Rupp conducted the roll call. Directors Hecathorn, Laird, Latt, Rupp and Woo were present. General Manager Paul Helliker, Superintendent Dale Davidsen, Business Manager John Friedenbach, and Board Secretary Sherrie Sobol were present. Pat Kaspari and John Winzler of GHD were present for a portion of the meeting.

#### B. FLAG SALUTE

President Hecathorn led the flag salute.

#### C. ACCEPT AGENDA

On motion by Director Laird, seconded by Director Rupp, the Board voted 5-0 to accept the agenda.

#### D. MINUTES

On motion by Director Laird, seconded by Director Latt, the Board voted 5-0 to approve the minutes of the November 16, 2016 regular meeting.

#### E. PUBLIC COMMENT

No public comment was received.

#### F. CONSENT AGENDA

President Hecathorn requested Items 2 and 4 be pulled. On motion by Director Rupp, seconded by Director Woo, the Board voted 5-0 to approve the Consent Agenda less items 2 and 4.

#### 2. City of Blue Lake Parks and Recreation- Thank you note

President Hecathorn inquired if the topic was discussed as the last meeting as she did not recall. The Board confirmed the item was discussed.

#### 4. Ruth Lake CSD 2016 Quagga Inspection Report

President Hecathorn noted the number of inspections conducted was unusually high and only one watercraft failed inspection. Our District and Ruth Lake CSD have done a good job getting out the word about the inspection process and its requirements. Director Rupp added that Quagga Mussels were a topic of discussion at the ACWA conference. Director Laird stated he has not heard much news about the other aquatic invasive species, the New Zealand Mud Snail.

On motion by Director Rupp, seconded by Director Laird, the Board voted 5-0 to approve Consent Items 2 and 4.

#### G. CORRESPONDENCE

Letter from California Energy Commission (CEC) re: Approval for RPS Certification, Matthews Dam Mr. Helliker stated the District received the approval certification from the CEC and the next step in the process is the meter installation which should be completed by April. Once the new meter is installed, the District will receive almost three times the previous rate under the new agreement. The revenue increase will benefit the ratepayers.

#### H. CONTINUING BUSINESS

#### 1. Water Conservation Regulations

The draft report on implementation of Executive Order B-37-16 was released on November 30th and comments are due by December 19th. Mr. Helliker is working with ACWA and sixtythree water agencies to prepare comments. He discussed the elements of the draft the water

PAGE NO.

#### HUMBOLDT BAY MUNICIPAL WATER DISTRICTSECTIO 828 7th Street, Eureka

Agenda for Meeting of Board of Directors

December 8, 2016, 9:00 a.m.

agencies are supportive of and those they are opposed to. The agencies are supportive of the new conservation targets for 2025, the five- year drought planning sequence in the Urban Water Management Plan (currently is three years), and language supporting reliable supplies. Water agencies are requesting revisions to include alternative compliance methods, allow and define variances, and clarify that the program must not affect water rights or the ability to use or transfer conserved water. Also, any changes should be implemented through new legislation. Director Rupp thanked Mr. Helliker for his involvement in the process and suggested that staff schedule a meeting with the representatives for our local legislators to discuss concerns with them and garner support. The Board concurred.

#### 2. Water Resource Planning

#### **Local Sales**

Mr. Helliker stated the City of Trinidad is interested in being a grant recipient for water supply. They requested their engineer, GHD, determine how the pipeline analysis relates to their previous analysis. Director Laird stated Westhaven CSD should be involved as well. Mr. Helliker responded that he has reached out to Westhaven CSD but has not received any response to his email inquiries.

#### Transport and Instream Flow

At the ACWA Conference, Director Rupp and Mr. Helliker met with Jim Watson of the Sites Reservoir JPA; Ara Azhderian, Assistant General Manager of the San Luis and Delta Mendota Water Authority; and Curtis Creel, General Manager of the Kern County Water Agency, to discuss the possibility of storing water in the Sites Reservoir and selling water to users in the San Joaquin Valley. The cost of transferring our water to the Sacramento River basin is currently prohibitive, but may become more competitive in price if the State Water Board requires additional outflows from reservoirs in the Sacramento and San Joaquin Valleys.

Director Rupp and Mr. Helliker also spoke with David Aladjem at the ACWA conference regarding instream flow. The District's water rights expire in 2029 and can apply for renewal as late as 2028. The only benefit to acting sooner is to garner any potential revenue available from an instream flow dedication. The Board had an in-depth discussion on what would be considered baseline flows versus beneficial instream flow dedication. There was also much discussion on allocation of the available water for presentation and discussion purposes. The current pie chart used to show potential allocation of HBMWD water rights; diversions at Essex has a green shaded area of 10 MGD that is listed as Transport or Instream. This is water that can be allocated to either or both beneficial uses, depending on the circumstances. Director Laird stated he would like the green slice to disappear. He recommended adding 5 MGD to transport and 5 MGD to instream flow. President Hecathorn inquired what the benefit is to changing the chart. Director Laird stated the current pie chart does not show how much instream flow is valued and he wants it made clear that instream flow is valued. Director Rupp stated the original costs were based on 40 MGD, therefore the cost sheet will need to be modified to more accurately reflect increased costs. Can this be done without incurring high costs? If so, he can agree on the change as a planning document for diversions at Essex. Mr. Helliker stated the current terms for transport are 30-40 MGD. Is the Board saying reduce it to state up to 35 MGD for transport? The Board confirmed this is the recommendation. On motion by Director Laird, seconded by Director Woo, the Board agreed for planning purposes to allocate 20 MGD of diversion rights at Essex to instream flows and 35 MGD to potential transport options.

Last month, the Board received a letter from the Humboldt Community Services District Board

#### HUMBOLDT BAY MUNICIPAL WATER DISTRICT SECTION 828 7th Street, Eureka

#### Agenda for Meeting of Board of Directors

December 8, 2016, 9:00 a.m.

expressing their questions and concerns regarding the instream flow option. Mr. Helliker provided a draft response letter for review. The Board provided input and the letter will be sent out soon.

#### 3. Cannabis activities

Mr. Helliker stated the State and Regional Water Boards as well as the Department of Fish and Wildlife are in the process of hiring for new positions to implement cannabis regulatory enforcement. The next phase of enforcement activities is expected to start as soon as new staff are hired.

#### 4. Ordinance 16 and Contract Changes

Mr. Helliker met with five of our seven Municipal Customers regarding changes to Ordinance 16. He will meet with Manila CSD on December 15th and Fieldbrook on December 20th. No concerns have been raised at this point. Staff should be prepared to bring the changes to Ordinance 16 to the Board for approval at the January meeting and changes to the water supply contracts in March or April, for implementation in July. Director Rupp confirmed that he and Mr. Helliker and possibly Director Latt will meet with the Eureka City Council for a broad orientation the first part of 2017 as there are several new Council members.

#### I. **NEW BUSINESS**

#### Oath of Office

Vice-President Laird administered the Oath of Office to President Hecathorn, Director Latt and Director Woo. All three Directors ran unopposed.

#### Employee Safety Incentive

Mr. Friedenbach discussed the current safety program and its components. He noted the District is committed to providing a safe and healthy work environment for all employees. The employees are very safety conscious. This is evidenced by the District's low Worker's Compensation ExMod factor of .67. Any rate less than 1.0 means there are relatively few worker injuries over time. A rate of .67 indicates a very strong culture of safe work practices for which the employees should be commended.

The District's worker's compensation and liability insurance is through the JPIA. A JPIA Risk assessment inspection was recently conducted by Mr. Scott Wood. Mr. Wood believed that the District's Safety Incentive Policy could be misinterpreted and construed as not compliant to OSHA standards. Mr. Friedenbach shared a new, OSHA compliant Safety Incentive Policy with the Board for possible approval. He noted that the District's Safety Committee members reviewed the new incentive plan criteria and were not opposed the revision. If adopted, the new criteria will be implemented on January 1, 2017. On motion by Director Rupp, seconded by Director Laird, the Board voted 5-0 to approve the new and revised Safety Incentive Policy.

#### J. REPORTS (from Staff)

#### 1. Engineering (11:00 a.m.)

Ranney Collector 1 Lateral Replacement Project (partially funded by Prop 84 NCIRWMP grant) Mr. Kaspari stated the Layne crew is getting ready for the holiday break. They will be back on January 9, 2017 and will begin work on the third lateral. The current contract shows a project completion date of December 31, 2016. A change order will be required to revise the date.

The contractor submitted Pay Request 5. Mr. Kaspari recommended approval of payment 5 in the amount of \$74,000 less retainage of \$3,700 for payment of \$70,300. On motion by Director Rupp, seconded by Director Latt, the Board voted 5-0 to approve Payment 5 to Layne Christensen.

### HUMBOLDT BAY MUNICIPAL WATER DISTRICT SECTION 828 7th Street, Eureka

Agenda for Meeting of Board of Directors

December 8, 2016, 9:00 a.m.

PAGE NO. 4

Blue Lake-FG CSD Water Line Replacement over Mad River (funded by Prop. 84 NCIRWMP grant and FEMA Hazard Mitigation Grant)

Mr. Kaspari shared that FEMA is finishing up their review and will do an informal consultation with the US Fish and Wildlife Department. There are no apparent conflicts. FEMA still needs to send the Cultural Resources Report to the State Historic Preservation Office and hopefully they will respond by January or February. If approval is received by February, the next step is a site survey and then perhaps go out for bid in the summer of 2017.

#### 1MG Reservoir Roof Replacement & Painting

Mr. Kaspari is aware of 3 bids so far. The bid opening is scheduled for December 21 at 3 pm.

#### 12kV and Surge Tower HMG/PDM

The 12kV project is still under review and FEMA staff are requesting more information. The person reviewing the Surge Tower says it looks good and should receive a letter soon regarding approval.

#### Miscellaneous Property Developments, Arcata

A few months ago, an Axel Properties project was discussed with the Board and a recorded easement was done with the County. They now want to build another building on the West End Road site. The building does not appear to impact our easement, however, Mr. Friedenbach sent them a letter reiterating our easement.

#### Status report re: other engineering work in progress

Mr. Kaspari discussed the earthquake that occurred earlier in morning. FERC requires a follow up status report for earthquakes over a magnitude of 5.0 and within 50 kilometers of the dam. Although the earthquake was a magnitude 6.5, it was beyond 50-kilometer range. The quake meter at the dam did not register any movement. As a precaution, a dam inspection and report will be completed. Mr. Friedenbach shared that he received a call from FERC asking about any effects on the dam from the earthquake.

#### 2. Financial

Director Rupp provided the November 2016 financial report. He noted that of the \$215,825 in project costs for the month, only \$30,000 was charged out under Price Factor 2. The remainder is funded by grants and other sources. Director Woo reviewed the bills and stated all was good. On motion by Director Rupp, seconded by Director Latt, the Board voted 5-0 to approve the November financial statement and vendor detail report in the amount of \$359, 249.54.

#### 3. Operations

#### Monthly Report

Mr. Davidsen provided the December Operational report. He stated Ruth Lake is full and it is the earliest it's filled in the past ten years. He shared that Pump Efficiency Testing Services was on site to conduct efficiency testing of the collector pumps and the pumps at the TRF. Initial testing shows the District should get a good rebate from PG&E. The District conducted the annual EAP Drill for R.W. Matthews Dam. This is a FERC requirement to test the emergency call lists and radios. Training including HazMat Violation Workshop, Fall Protection-Competent Person, Reasonable Suspicion, and First Aid and CPR/AED training. Director Rupp inquired who provides the training. Mr. Davidsen replied there are several different organizations that provide

# HUMBOLDT BAY MUNICIPAL WATER DISTRICT SECTION 828 7th Street, Eureka

Agenda for Meeting of Board of Directors

December 8, 2016, 9:00 a.m.

CTION P

the training but much of it is locally through the North Coast Safety Consortium (NCSC). Mr. Friedenbach added the District is a member of the NCSC and one of the benefits is free training. He noted the Board can attend the training as well and will send them a schedule of upcoming trainings. Mr. Davidsen and the Board discussed future security improvements. The Board concurred that security is a priority and recommended staff provide a scope of work and receive bids for updating the system, provided that staff is comfortable with the current system and improvements are not imperative. Staff confirmed the improvements can wait. Mr. Davidsen shared the Notice of Inspection from Mr. Imperiale of CalFire. The notice states that Mr. Imperiale is hopeful the District will begin harvesting the dead and dying trees in next month or two. Mr. Davidsen shared the quotes received to remove the trees. It will cost approximately \$20,000 to remove the hazardous trees around headquarters. He noted this is just for headquarters and does not include the hundreds of other dead, dying and diseased trees on District property at Ruth. Director Laird stated he is not supportive of cutting trees and inquired if the District has a Timber Harvest Plan done by a licensed professional forester, Director Rupp stated if we do nothing, we may lose even more trees. Mr. Helliker responded that the District does not need a Timber Harvest Plan and it would cost over \$100, 000 to do one. He also noted that Mr. Imperiale of CalFire is a licensed professional forester. Director Latt suggested staff get a quote for Timber Harvest Plan and leave some select dead trees for habitat. Director Woo also suggested staff check with the US Forest Service (USFS) to see what their plans are for dead, dying and diseased trees since most of the property surrounding District's is owned by the USFS. The Board requested staff bring back the issue of tree removal at headquarters next month.

#### SCADA System Upgrade Project

Mr. Davidsen reviewed the bids received. He recommended awarding the bid to Telestar, the lowest, responsive, responsible bid. He stated he is still awaiting a schedule of values from Telestar and recommended award of the contract be contingent upon receipt of the schedule. On motion by Director Laird, seconded by Director Woo, the Board voted 5-0 to award the contract to Telestar, contingent upon receipt of the schedule of values.

#### K. DIRECTOR REPORTS & DISCUSSION

#### 1. General

Director Laird attended a Eureka Chamber of Commerce Business Committee meeting. He discussed water rights, and Water Resource Planning.

Director Hecathorn stated new officer elections will take place at the January meeting. She also stated the General Manager Performance Review will take place during closed session at the January meeting.

The Board discussed holding a Special meeting to interview and possibly appoint a new Director. The Special meeting will be on January 19 at 9 am.

#### 2. ACWA-JPIA

As part of the Fall Conference, Director Rupp attended an Employee Benefits Committee meeting where they are looking at ways to reduce the costs of medical coverage. He also attended a Board of Directors meeting as well as an Executive Committee meeting.

#### 3. ACWA

Director Rupp and Mr. Helliker reported out on their attendance at the ACWA Fall Conference. Director Rupp attended a Finance Committee meeting and looks like dues will be increasing by

#### HUMBOLDT BAY MUNICIPAL WATER DISTRICTION 828 7th Street, Eureka

#### Agenda for Meeting of Board of Directors

December 8, 2016, 9:00 a.m.

three percent. They attended the Region 1 meeting and Director Rupp stated he would really like to see Mr. Helliker serve on that Board. Presentations attended included weather predictions by NOAA and one on atmospheric rivers. It was a good conference.

#### 4. Organizations on which HBMWD Serves: RCEA, RREDC, NCRP

Director Woo attended the RCEA meeting. Things are moving forward and they are on schedule for the launch of the Community Choice Energy program in April of 2017. They also put together an outline for orientation of new Board members.

President Hecathorn attended the RREDC meeting in lieu of Director Rupp since he was at the ACWA Conference. She reported that Leila Roberts, the new Director of the North Coast Small Business Development Center was the guest speaker. The Board went into closed session to conduct a performance evaluation for the Executive Director.

#### **ADJOURNMENT**

The meeting adjourned at 3:08 pm.

Re: 2015-16 Dam Safety Surveillance and Monitoring Report (DSSMR)

Dear Mr. Helliker:

This letter is in response to your March 28, 2016 letter submitting the Dam Safety Surveillance and Monitoring Report (DSSMR) for R.W. Matthews Dam, part of FERC Project No. 3430. We have reviewed the report and concur with your evaluation of the current and historic instrumentation data and development of the established action levels. We have no further comments.

Your cooperation in this aspect of the Commission's dam safety program is appreciated. If you have any questions or comments, please contact Mr. Sam Lee at (415) 369-3393.

Sincerely,

Frank L. Blackett, P.E. Regional Engineer

# STATE: Quagga mussel infestation discovered in Pyramid Lake; state imposes boating restrictions

SATURDAY, 10 DECEMBER 2016 00:56 LAKE COUNTY NEWS REPORTS

The quagga mussel is a small, non-native freshwater mollusk that the Department of Water Resources had successfully prevented from infesting the State Water Project since the species was first discovered in California in 2007.

However, on Dec. 8, six adult quagga mussels were found in the Angeles Tunnel, which serves as a connector between Pyramid Lake and Elderberry Forebay, two State Water Project components north of Los Angeles.

The California Department of Fish and Wildlife, or CDFW, has concluded that Pyramid Lake must be considered infested with the invasive species, and Elderberry Forebay and Castaic Lake, both downstream from Pyramid Lake, are presumed infested with the mussels.

The Department of Water Resources, or DWR, discovered the mussels during a scheduled inspection of Angeles Tunnel. Six adult guagga mussels were found in the tunnel.

DWR said there is no evidence of mussel reproduction, and no larval or "veliger" stage mussels have been found in Pyramid Lake during DWR's routine monthly veliger detection monitoring.

No young sub-adult mussels were found in the tunnel, and no mussels have been found in Castaic Lake. Both lakes are actively monitored each month.

The "infested" determination for Pyramid Lake means boats must be inspected and thoroughly washed upon leaving the lake.

It also means those boats will not be granted a "clean boat" tag that normally is given to boats when they leave water bodies that do not contain quagga mussels. The tag is a visual sign that the boat does not require inspection prior to entering other bodies of water.

DWR currently is implementing the steps outlined in its rapid response plan. Notifications have been sent to CDFW, the Los Angeles Department of Water and Power, the Los Angeles County Parks Department, the Metropolitan Water District of Southern California and SWP contractors affected by this discovery.

DWR's response team is preparing to mobilize and delineate the extent of the mussel population. These efforts are being coordinated with CDFW, the State's lead agency in invasive mussel management.

Quagga mussels can clog water systems, alter food webs in ecosystems and damage boat engines.

Concerns about the spread of the mussels across California has led to a Lake County Mussel Program, which requires screenings and stickers to help prevent the mussels' arrival, which can devastate a local ecosystem.

#### Sewer/water bills likely to rise in Manila

5 hours ago

SECTION F2 PAGE NO. 2

#### Jack Durham Mad River Union

MANILA - Residents in the salty outpost may see their combined sewer/water bills go up by \$14.49 a month by next summer.

The rate increase was discussed by the Manila Community Services District Board of Directors at its Dec. 15 meeting, during which the board received a presentation on a water and sewer rate study from Brett Vivyan, an engineer with GHD, who is also a Manila resident.

Vivyan provided a detailed report to the board showing that, although water and sewer rates have not increased in eight years, inflation has, jacking up the costs of supplying water to the peninsula town's 350 customers. Another blow to the district was the closure this year of the Sierra Pacific Mill, which was the town's largest water customer.

Vivyan estimated that the average operating budget for the town's water department would be about \$194,00 a year over the next five years. If rates are not raised, the fund would incur an average annual deficit of about \$35,000.

The sewer department would have an average operating budget of \$189,000 a year over the next five years, with an average deficit of \$13,000.

In order to erase those deficits, the average monthly combined sewer/water bill, which is now about \$68.29, would need to be raised to about \$82.78, an increase of about \$14.49 a month.

The actual charge would depend upon the size of a customer's water meter and the amount of water consumed.

These numbers are preliminary, and don't include possible changes to the district's contract with its wholesale water supplier, the Humboldt Bay Municipal Water District.

Firmer numbers may be brought back to the board in January. The board may also consider phasing in the increase, which would result in planned deficits in the first few years until the increases caught up with the district's revenue needs.

Public hearings on the increase could be held as early as March.

You can read the draft of the rate study here: 20161215\_Water&SewerRateStudy

# Climate Ready dune project is failing

'n June 2015, a local nonprofit, Friends of the Dunes, was awarded a \$249,000 grant by the Coastal Conservancy to study the changes taking place on our coastal dunes from Moonstone Beach to Centerville.

The project is meant to measure areas of different vegetation types and sediment deposits. This may help us to better understand how our coastal dunes may be adapting to climate changes such as anticipated sea level rise.

At the onset of the program, it was somehow decided to use a data-gathering system that does not interface well with the extensive work that Aldaron Laird completed a few years ago while mapping vulnerable areas around Humboldt Bay.

Secondly, the Fish and Wildlife Service decided to change the previously-approved method for removing vegetation at a site on Lanphere Dunes. Instead of hand removal, poison was used. Without notifying any of the collaborators in the project or the public, the Refuge Director Eric Nelson decided to spread approximately 55 gallons of herbicides on an acre of primary dunes. He used Climate Ready grant money, per his signed, although controversial, Categorical Exclusion.

The non-selective herbicide cocktail of Glyphosate/Imazapyr was applied twice, once in March and again in October just a month before planting fragile native plants. Imazapyr stays deadly for up to 12 months. The questions asked of Mr. Nelson relating to this use of poison and the conflicting messages he has provided the public have not been adequately addressed.

At a quarter-acre site on a Friends of the Dunes property in Manila, they planned to dig up one grass to replace it with another. It cost us \$5,000. The total area ended up being about half the contracted square footage. Eighty-five percent of the new grass has died.

Statements recently made by the Fish and Wildlife Service Refuge staff indicate that they have somehow concluded that to prepare for di- projects; would show some transparent oversight. mate change, we should have "rolling dunes." They think we should purposely destabilized sand to migrate inland onto very rare dune hollow wellands and dune shrub habitat, onto roads, homes and other important infrastructure

There has yet to be any justifiable reasoning or documented support for such a concept however.

Extensive Oregon University studies have reached a very different conclusion, and some areas in Oregon have begun replanting the very same grass that land managers here have been tearing

out, bulldozing and poisoning. The coastal land managers along the east coast go to great lengths to protect their beachgrass to build and stabilize their dunes.

We were also promised quarterly reports to keep abreast of the project, but have waited over nine months since the last one. We were also promised public meetings every six months. The last one took place over nine months ago, and we have been told no additional meetings are scheduled.

The multitude of questions and concerns the public brought to the first (and so far, only) meeting have been completely ignored. The public outreach coordinator assigned to the project has quit.

Our hard-earned tax money is being used to collect data that is largely incompatible with important, expensive and hard-earned data we already have.

A 55-gallon drum of poison has been spread on the Lanphere Refuge, a place one would think could be spared such an assault. Baykeeper, Friends of the Dunes, the North Coast Environmental Center, EPIC and a host of other environmental organizations have spoken out against the use of herbicides for non-native plant eradication projects.

We spent \$5,000 to dig up one-eighth of an acre of one type of grass and replace it with another type that is dying or dead. We ended up with a significant lack of promised project updates and public meetings. The public's only direct contact person with the project quit.

The public cannot get honest, transparent answers to understand how questionable and highly controversial decisions and conclusions are being made. Those whom we should be able to get real answers from have gone into hiding.

Are we getting what we paid for? Obviously, we are not. But chances are these same folks will have their hand out for another \$250,000 next year. It would be encouraging if there were some indication that the Coastal Conservancy, who funds these To date however, they have kept their head in the sand while keeping up the longstanding cozy and very profitable relationship.

While the original goal of the project does seem worthy, once again, the implementation of the pork barrel extras have failed. The promises, transparency and contracts with the public have quickly been sacrificed now that the check has cleared the

bank. We can do better. A lot better.

Uri Driscoll is an environmental activist.

RE: 2016/17 Quagga and Zebra Mussel Infestation Prevention Grant Program

(Letter of Award)

Agreement No.:

C16Q0805

Fiscal Year:

2016/17

Term:

February 1, 2017 through January 31, 2019

Amount:

\$63,500.00

Thank you for submitting an application for the 2016/17 Quagga and Zebra Mussel Infestation Prevention Grant Program. The California State Parks, Division of Boating and Waterways (DBW) is pleased to inform you that your project titled "Improved and Additional Inspection/Launch Site Facilities" for \$63,500.00 will be fully funded with the following condition(s):

 The applicant must structure the project's Scope of Work and Task Schedule as instructed in the grant guidelines and grant agreement.

The next step in the process is to complete and execute the attached Grant Agreement by including the Scope of Work, Task Budget and Line Item Budget with the agreement. The Agreement and pertinent documents need to be returned by February 15th, 2017 to the DBW Grant Administrator, Leticia Padilla, to the mailing address referenced above. If you need assistance in developing the Grant Agreement please do not hesitate to contact me at: (916) 327-1851 or Leticia Padilla at: (916) 327-1270.

Congratulations and we look forward to working with you on implementing the project.

#### **HUMBOLDT BAY MUNICIPAL WATER DISTRICT**

To: Board of Directors

From: Paul Helliker

Date: January 12, 2017

Subject: Water Conservation Regulations

#### **Conservation Regulations**

The State Water Resources Control Board will review a draft of proposed changes to emergency conservation regulations on January 18, and will conduct a hearing for final approval on February 7. In the comment letter described below, 114 water agencies (including HBMWD, Arcata, Eureka, HCSD and McKCSD) recommended that the Board rescind regulations for districts that have adequate supply in 2017. Given the fact that Ruth Lake filled in November and continues to spill, Humboldt Bay agencies would qualify for such a rescission.

#### **Executive Order B-37-16 Implementation**

The SWRCB and DWR issued their draft report on implementation of the Executive Order in November, and comments were due on December 19. HBMWD joined with 113 other agencies and associations to provide the comments in the attached letter. The Administration is expected to issue their final report, including a legislative proposal, in February.

Some elements, such as ongoing monthly reporting requirements and permanent prohibitions of various water uses, will be considered by the SWRCB under existing authorities. However, it is not clear that they have adequate authority to establish such requirements on a statewide basis, so we will wait to see what they propose.

ACWA has established a subcommittee of the State Legislative Committee to address potential legislation on the Executive Order, which could be as comprehensive and controversial as was the water package in 2009 (which took more than 3 years prior to that to negotiate). The subcommittee, in which I will be participating, has an initial conference call on January 11.

SECTION HI PAGE NO. 2

VIA EMAIL: wue@water.ca.gov; commentletters@waterboards.ca.gov

December 19, 2016

The Honorable Felicia Marcus, Chair State Water Resources Control Board 1001 I Street, 24th Floor Sacramento, CA 95814

The Honorable Mark Cowin, Director California Department of Water Resources P.O. Box 942836, Room 1115-1 Sacramento, CA 94236-0001

SUBJECT: Comments on "Making Conservation a California Way of Life" November 2016 Public Review Draft

Dear Chair Marcus and Director Cowin:

The undersigned water suppliers and associations comprise designated members of the Urban Advisory Group (UAG) convened by the State to provide input on the framework for implementation of Executive Order B-37-16 (EO) and additional participants in the recent stakeholder outreach process. Many of us submitted a joint comment letter and detailed recommendations dated October 18, 2016, and we include that package with this letter, as it continues to be germane to the Public Review Draft. We would also like to draw your attention to a comment letter being submitted today from the American Water Works Association, California-Nevada Chapter, which pertains to portions of the Public Review Draft.

We would like to express our ongoing appreciation for the opportunities that the State has offered to provide input in this process. We continue to be committed to helping define a successful framework to help California prepare for and respond to future droughts, and to promote the long-term efficiency of water use. We would like to collaborate with you and your colleagues in the Brown Administration to craft a legislative package that we can all support.

While we are largely supportive of the initial recommendations in the Draft Report, we cannot support any policy that allows the State Agencies carte blanche in determining future water-use budgets, prohibitions or performance measures. We believe all new water-use target setting efforts must include a formal stakeholder involvement process, allowing for input on technical considerations and the potential for unintended consequences.

The conservation framework must take into account the One Water policy perspective, seeking a balanced and integrated approach to sustainable water management. Water sustainability and drought resilience must be measured in terms of BOTH water-use efficiency and the development of new supplies and storage.

To that end, we are concerned that the uncertainty associated with unknown future conservation regulations will serve as a significant *disincentive* for the development of new sustainable supply sources

and storage by local agencies, and we strongly believe that this would be an unwise direction for California to take. As such, several of our comments are aimed at improving incentives for new supply development while maintaining water-use efficiency principles.

Similar to the approach we took in October, we have identified the elements of the Public Review Draft that we support and which we believe will improve water management in the future, and we have provided specific feedback aimed at improving the proposal. We support the enforcement of water use efficiency targets in 2025, the transition to a five-year drought planning sequence in the Urban Water Management Plan, and the additional components proposed for the Water Shortage Contingency Plans – communication plan, specific compliance and exemption procedures, monitoring and reporting protocols and a regular review process. We also believe that providing State agencies with our annual supply and demand assessments will facilitate better understanding of hydrologic conditions throughout the state.

We have identified the following areas of continued concern, which we look forward to resolving with the Executive Order agencies in the final report (the citations in each comment refer to the relevant section(s) of the Public Review Draft).

#### **Using Water More Wisely**

Section 2.1 Emergency Conservation Regulations for 2017

As the State Water Resources Control Board (SWRCB) considers extending the emergency
regulation in January/February 2017, they must consider that many parts of the state are not
experiencing emergency drought conditions due to improved hydrologic conditions,
development of drought resilient supplies, or both. The SWRCB should rescind the emergency
conservation regulations for those areas with adequate supplies, and focus on those
communities that require assistance in meeting the water demands of their community. The
SWRCB could continue its "stress test" demand reduction measures for areas in which supplies
are inadequate in 2017 to meet normal demands.

#### Section 2.2 Permanent Prohibition of Wasteful Practices

We request that the EO agencies include language to exempt residents from these prohibitions
in the case of a public health or safety emergency and that uniform definitions of "measurable
rainfall" and "street medians" be provided. We also ask that it be made clear in Section 2.2.4
that it will be the responsibility of local agencies to enforce these new regulations.

Section 2.4 Process for Determining Cost-Effectiveness of Water Conservation and Energy Efficiency

It is stated in this section that the cost-effectiveness of potential appliance standards is based on
the value of the water or energy saved, the effect on product efficacy for the consumer, and the
life-cycle cost of complying with the standard to the consumer. The California Energy
Commission (CEC) assesses the cost effectiveness of a proposed appliance standard by surveying
and comparing the cost and operation of compliant and non-compliant appliances. Any
increased costs must be offset by water and energy savings due to the increase in appliance

efficiency. We call on the CEC to include potential wastewater system impacts as a valid life-cycle cost associated with indoor appliances when conducting its cost-effectiveness analysis.

#### Section 3.1 New Water Use Targets

#### General

- Alternative Target-setting Approach (Sections 3.1.1 and 3.1.2.) We continue to request that the State include optional approaches to the strengthened standards target-setting process that build on the elements of SB x7-7, as is directed by the EO. Expansion of the State agencies' water budget based proposal to provide for alternative target-setting approaches that can be customized to unique local conditions, would be equally effective in reducing water use and would allow for alternative methods to reducing water demands that could be more cost-effective for some agencies to implement. This is particularly important for water agencies that lack resources or capacity to implement water budget programs, or for water agencies that would benefit from this additional flexibility. We also believe that a regional compliance approach should be allowed as an option.
- No Impact on Water Rights. The new water use efficiency program requirements must not adversely affect water rights or contracts held by water suppliers in California, and must explicitly recognize the ability of water suppliers to use or transfer the conserved water, pursuant to Water Code Section 1011. These provisions are already contained in Water Code Sections 10608 et seq. (SB x7-7), and must be maintained in any modifications thereto or in any new Water Code language to implement the Executive Order. We ask that language be added to the executive summary and introduction clearly stating the state's intent to preserve water rights as the elements of the Executive Order are implemented.
- Sustainable Water Management. When setting water use standards, it is imperative for the EO agencies to recognize that water conservation by itself is not going to result in a resilient supply that can manage severe shortage situations, which the state is likely to face in the future. As described in Governor Brown's California Water Action Plan, an integrated and sustainable approach must include both water use efficiency and local supply development. When considering lowering the standards on water use, the state must take into account local efforts in developing drought resilient supplies, as mentioned in section 4.2.2 of the Public Review Draft.

#### Indoor and Outdoor Standards

• Water Use Efficiency Standards and Reporting (Section 3.1.3.) We support the proposal to establish 55 gallons per capita per day (GPCD) as the indoor use standard and the use of MWELO standards in place when landscapes were installed as the outdoor use standard for residential properties, when using the proposed method, for determining compliance with the new efficiency targets in 2025. The landscape standard should be applied to irrigable areas of parcels. We support reporting on compliance with the 2025 targets in the 2025 Urban Water Management Plan. We do not support annual reporting on targets either before or after the

Page 4

2025 Plan. Finally, while we are open to considering lower water use standards for residential customers in future years, we insist that any such consideration be inclusive of a public stakeholder process.

- Indoor Standards Workgroup (Section 3.1.3.) Similar to the Landscape Area Measurement Workgroup, which is to assist the state in developing the outdoor irrigation standard, the EO agencies should form an Indoor Standards Workgroup to assist the state in evaluating the data and research to be utilized in determining the 2025 indoor standard. As part of this effort, the EO agencies must conduct a scientific evaluation to identify potential impacts on wastewater systems and recycled water/potable reuse production before the indoor water use standard is reduced to a standard below 55 GPCD.
- Landscape Area Measurement Data (Section 3.1.3.) We request that the State provide to water suppliers either the detailed, verified landscape data for every parcel in a water agency that chooses to use the water use efficiency compliance method defined in the Public Review Draft or the funding for the agency to perform this analysis. A significant amount of data and technical assistance, as well as dedication of precious fiscal resources, will be required to implement these standards. The process and methods to obtain and disseminate the data will need to be transparent and technically sound in order to ensure credibility with the public and local decision makers.

In lieu of using state-supplied landscape data, water suppliers should be allowed to use self-supplied landscape data of equivalent or superior quality to develop targets. Additional landscape data provided by water suppliers could be used to address unique conditions in a service area such as agricultural land or to provide updated landscape area reflecting service area growth. Any landscape data provided by the water supplier would be required to incorporate landscape area assumptions and definitions consistent with those used in the state-supplied data set. We urge the State to take a deliberate and iterative approach that includes verification of accuracy by an independent third party and allows sufficient time to test the proposed standards and make refinements as necessary. In this regard, any delay in the availability of verified landscape data should be reflected in compliance deadlines for water suppliers.

- <u>Variances</u> (Section 3.1.3.) We request that the EO agencies develop and implement a variance
  process to allow for the establishment of indoor and outdoor water use standards according to
  a water supplier's unique conditions, such as providing more water than the average for large
  animals, swamp coolers, home food production, etc. We ask that the draft framework include
  the development of variances and a variance process through a collaborative effort with water
  industry stakeholders.
- <u>Recycled Water</u> (Section 3.1.3.) The recycling and reuse of water is considered an efficient use
  of supplies and therefore should be removed from the water production calculations for
  determining compliance with 2025 targets, consistent with SB x7-7 (as is noted on pages 3-2 and
  3-3 of this report). This approach will ensure incentives for the continued development of

Page 5

recycling and potable reuse projects, which are critical to a resilient and sustainable water supply future for California.

#### Commercial and Industrial Performance Standards

• Commercial, Industrial, and Institutional (CII) Performance Measures (Section 3.1.3.) We support the exemption of CII water uses from volumetric targets. We conceptually support the establishment of performance measures for the CII sector but recommend that a CII workgroup with representative members from a broad spectrum of industries be engaged in the establishment of performance measures rather than by dictate in this report. Participation by industry along with water supplier representatives will help ensure Performance Measures are appropriate, effective and result in efficient water use without impairing economic activity. Further, we believe the stakeholder process is essential for achieving long-term support of Conservation as a Way of Life in the CII sector. The development of Performance Measures should build on the CII taskforce report completed in 2013. We also request the language concerning audits be revised to read:

Work with willing CII customers to conduct representative water-use audits or water management plans for CII accounts over a specified size, volume, or percentage threshold or an equivalent measure determined by the CII workgroup.

#### Water Loss

- Water Loss Requirements (Sections 2.3.3 and 3.1.3.) The Draft describes the requirements of SB 555 and the actions planned by DWR, CPUC and the SWRCB in Section 2.3.3, including potential loss standards and enforcement tools. We do not support also including water loss requirements in overall efficiency targets, as doing so creates an unnecessary, redundant and potentially conflicting compliance requirement.
- Reporting, Compliance Assistance and Enforcement (Section 2.3.4.) We support submittal of
  validated water loss audit reports to the California Department of Water Resources (DWR) by
  October 1, 2017 as is already required by law. However, we do not support the provision to
  disqualify agencies that do not submit these reports by that date from eligibility for DWR grants
  and loans.

#### Implementation and Enforcement

- <u>Legislative Role In Updates to Water Use Targets</u> (Section 3.1.3.) Any revisions of the standards
  and CII performance measures beyond the 2025 compliance period must only be implemented
  through future legislation. The role of the Legislature in crafting and refining California's water
  use policies and water use efficiency standards is critical, as is the role of the Legislature in
  providing agency oversight and accountability.
- <u>Enforcement Measures</u> (Section 3.1.4.) The consequences for a water supplier that fails to meet its 2020 water use efficiency standard consist of that water supplier becoming ineligible for

Page 6

State grant funding. Water Code Section 10608.56 includes additional provisions that condition the imposition of such sanctions. We believe that these sanctions provide adequate incentive for water suppliers to achieve the water use efficiency standards proposed in the Public Review Draft and that any other financial penalties or enforcement processes would be unnecessary and counterproductive.

<u>Timeline Feasibility</u> (section 4.3.) The EO agencies have proposed a significant number of
important tasks to be completed between 2017 and 2018. We request that the state provide
additional details on specific timelines and hold a workshop to ensure the schedule is realistic by
seeking input from water suppliers regarding the possible impacts/constraints on staff and
budget.

#### **Eliminating Water Waste**

Section 2.2 Monthly Reporting and Permanent Prohibition of Wasteful Practices

- <u>Existing Authority</u> (Section 2.2.3.) The Public Review Draft notes that the EO agencies plan to
  implement monthly reporting requirements and permanent water use prohibitions through
  existing authority. We request that the State provide more detailed information about the
  specific statutes that provide this authority.
- <u>Stakeholder Input</u> (Section 2.2.3.) A stakeholder workgroup should be formed as part of the
  rulemaking process to ensure the reports submitted monthly serve a meaningful purpose to the
  state and public and that the statewide permanent prohibitions are appropriate for
  communities throughout the state.

#### **Strengthening Local Drought Resilience**

Section 3.2 Water Shortage Contingency Plans

- Water Shortage Contingency Plan, Recommendation Updated Contents of the Urban Water
   Management Plans (Section 3.2.3.) In order to acknowledge the benefit of developing drought resilient, hydrologically independent supplies consistent with the California Water Action Plan, we request that the following be added below 2. Evaluation Criteria:
  - e) Drought resilient, hydrologically independent supplies such as potable reuse, recycled water and desalination are considered fully reliable under all historical drought hydrology and plausible climate change effects.
- Water Shortage Contingency Plan, Recommendation, Contents of the Water Shortage
   Contingency Plans (Section 3.2.3.) This section should be clarified to acknowledge that in some cases where water suppliers have in place or may invest in drought resilient, hydrologically independent supplies, these agencies may in fact not experience shortages under drought

conditions. In light of this, we recommend the following language be added to 4. Shortage Levels. Evaluation Criteria:

- Water suppliers with a substantial portfolio of drought resilient, hydrologically independent base supplies may not experience shortage conditions due to drought or climate change. Water suppliers with validated, reliable, base water supplies of this type shall only be required in WSCPs to address shortage levels up to the maximum percentage that can be feasibly caused by dry hydrologic conditions.
- Additional Dry Year Analyses (Section 3.2.3). We do not support the State's proposal to require
  "one or more <additional> dry years" to be analyzed as part of the annual water budget
  forecast. We would support an analysis of one additional dry year in the forecast, if conditions
  require a water supplier to implement its water shortage contingency plan.
- Water Shortage Contingency Plans (page 3-13). It must be made clear that should an agency
  implement its defined shortage response actions (SRA's) that effectively move the agency out of
  a shortage condition, then there is no need for the agency to declare an emergency, or be
  considered to be in an emergency shortage condition by the DWR or SWRCB.
- Drought Planning for Small Water Suppliers and Rural Communities, Current Status (Section 3.3.1.) While SGMA implementation will be important to future water supplies in California, and sustainable groundwater management will be a key element of preparing for and responding to future droughts, we believe the Draft mischaracterizes the authority and responsibility of GSAs relative to Drought Planning for Small Water Suppliers and Rural Communities. We believe that drought planning for specific water systems and assurance of future water supplies is beyond the scope of SGMA, and recommends this reference (p 3-16, second column, lines 5-11) be removed from the document. While GSAs must consider the interests of all water users, they do not have an explicit obligation for water supply reliability to any user.
- Drought Planning for Small Water Suppliers and Rural Communities, Recommendations (Section 3.3.3.) We request that the framework clarify that those small water systems which have already established their own shortage plans should retain the flexibility to maintain the authority to implement their shortage plans and coordinate with their respective water wholesaler or County and not be subject to a new duplicative countywide effort.
- <u>Drought Planning for Small Water Suppliers and Rural Communities, Recommendations</u> (Section 3.3.3.) We support the effort to improve drought planning for small and rural water suppliers but do not recommend adding additional requirements to Groundwater Sustainability Plans without appropriate and necessary stakeholder input. We request the coordination language be revised to read:

 Coordination – Work with stakeholders to develop opportunities to coordinate SGMA efforts and drought planning. Evaluate options for reflecting drought planning and responses in Groundwater Sustainability Plans.

Thank you for the opportunity to comment. We look forward to continued collaboration with staff of the State agencies to develop a framework by the January 2017 deadline that meets the objectives of the EO while preserving local water supplier authority and providing flexibility in implementation.

January 12, 2017

Honorable Jerry Brown, Governor State of California State Capitol Sacramento, CA 95814

#### Dear Governor Brown:

I am writing on behalf of the Board of Directors of the Humboldt Bay Municipal Water District, the water supply provider for over 80,000 residents of Humboldt County. We serve seven retail agency customers – the Cities of Arcata, Blue Lake and Eureka and the following community services districts: Fieldbrook-Glendale, Humboldt, Manila and McKinleyville.

Our water supply comes from the Mad River, on which we operate Ruth Reservoir. This reservoir has filled completely every year during the past five years. It filled again in November, 2015, which is the earliest it has filled for the past ten years. Additionally, rainfall in the Humboldt Bay area was 125% of average in water year 2015-16, and so far this water year, is 164% of average.

In the Sacramento Valley, where the State's major urban water supply reservoirs are located, Shasta, Oroville and Folsom Reservoirs are all above normal storage levels for this time of year, and flood control releases are currently underway throughout the Valley. This water year is the wettest on record, with precipitation currently running 182% of normal in the Sacramento Valley, and snowpack at 103% of average statewide. Precipitation levels are greater than average in Central and Southern California, as well.

With the wetter than normal conditions in the Sacramento Valley beginning in 2015, the State was no longer experiencing a statewide drought emergency. These conditions have improved even further this year, as drought conditions no longer exist in any part of the state. In fact, many rivers in the State are now in flood condition.

For the past two years, we have repeatedly presented information to the State Water Resources Control Board and other agencies in your Administration that shows that Northern California has not been experiencing a drought. We now call on you to rescind your emergency proclamation of drought conditions, contained most recently in Executive Order B-37-16, in recognition of the extremely wet conditions statewide that California is experiencing this water year.

Sincerely,

Barbara Hecathorn President

### **HUMBOLDT BAY MUNICIPAL WATER DISTRICT**

To: Board of Directors

From: Paul Helliker

Date: January 12, 2017

Subject: Water Resource Planning (WRP) - Status Report and Possible Action

The purpose of this memo is to summarize recent activities and introduce next steps for discussion.

### 1) Top-Tier Water Use Options

### a) Local Sales

The Harbor District is pursuing a project to locate a data center at the former mill site. A data center could require significant water supplies for cooling. The center would be connected to the fiber optic cable runs being planned from Redding to Eureka and across the Pacific from Asia. California has no undersea fiber optic connections to Asia, due in part to the difficulty of dealing with Coastal Act limitations implemented by the Coastal Commission. The outfall structure would allow for a terrestrial landing without requiring approval of a new facility in the coastal zone. The data center would require a waiver of Coastal Dependent Industrial zoning limitations.

### b) Transport

No activity transpired on this front in December.

### c) Instream Flow Dedication

We are currently developing a schedule and a workplan for revising the diversion rights at Essex to implement a dedication of an annual average of 20 million gallons per day of water to instream flow. This flow has not been diverted at Essex since the late 1990's.

### **HUMBOLDT BAY MUNICIPAL WATER DISTRICT**

To: Board of Directors

From: Paul Helliker

Date: December 8, 2016

Subject: Modifications to Ordinance 16

As discussed in recent Board meetings, we are proposing to modify Ordinance 16, to address various issues, such as the closure of the Sierra Pacific mill in Manila and the impact on their revenues, the limitation in capital expenditures by HBMWD and update of sections that are out of date. The changes are presented in the attached changes, which are highlighted in yellow, with existing language in strikeout format. Only sections that are proposed to be amended are provided and they are:

Title - add a line to note amendments in 2017

Section 4.1 - add a sentence to note that the current cost allocation is 100% to municipal customers

**Section 7.2.2.2** – revise the schedule for the quintennial revision of the Peak Rate Allocation to commence again on July 1, 2017 (to address revenue changes in 2016 in the Manila Community Services District)

**Section 7.2.5** – replace the current limit on capital expenditures with a quintennial Capital Improvement Plan update process

Section 18 – revise the effective date of the ordinance, to reflect the new revisions

# Humboldt Bay Municipal Water District Ordinance 16 as Amended June 2006 as Amended January 2017

## Establishing Rates, Charges and Conditions of Service For Water Sales To Municipal Water Customers

**BE IT ORDAINED**, by the Board of Directors of the HUMBOLDT BAY MUNICIPAL WATER DISTRICT (hereinafter HBMWD), as follows:

- 1. <u>Definitions</u> as used in this Ordinance, the following terms shall have the following meanings unless the context clearly otherwise requires:
  - 1.1. <u>A/B Bond Taxes</u> taxes received by HBMWD pursuant to a levy allowed in accordance with the Series A and B general obligation bonds authorized by voters within HBMWD in 1956.
  - 1.2. Average Daily Water Use the average daily use, expressed in million gallons per day (MGD), in any given calendar year, as calculated from data recorded by HBMWD's meters and data collection system totalizers. The number for the most recent calendar year shall be calculated, by HBMWD, by January 30 of the subsequent calendar year. The number shall be obtained by dividing the total amount of water used by a given Customer in the calendar year by the total number of days in that same calendar year.
  - 1.3. <u>Base Water Facilities (BWF)</u> -- all HBMWD wells, diversion facilities, dams, pumping facilities, storage tanks, or water transmission and distribution facilities; all electrical, radio, electronic, computer and control (SCADA) systems; and any related appurtenances existing as of June 30, 1999.
  - 1.4. <u>Drinking Water Filtration Plant (DWFP)</u> the water filtration facility as designed to meet the State's water quality mandate as it exists on the effective date of this Ordinance.
  - 1.5. <u>Drinking Water Treatment Facilities (DWTF)</u> -- all facilities and appurtenances relating to the treatment of water for potable use. Specifically, this includes the new State required DWFP and the existing disinfecting system.
  - **1.6.** General Reserves those moneys set aside by HBMWD's Board of Directors in any fund (e.g. general fund, general reserve, contingency reserve), regardless of the type or purpose of such fund, but exclusive of:

maintenance, repair and replacement of Base Water Facilities and the Drinking Water Treatment Facilities - including the new DWFP.

- 3.1. The sections of this Ordinance 16 relating to Industrial Water Customers or Industrial Water Facilities are included only to define the initial proration of the BWF costs and Revenue Credits between the Industrial Water Customers and Municipal Water Customers. Once derived, the proration of the costs and Revenue Credits allocated to the Industrial Water Customers will be determined from time to time via contract with those Industrial Water Customers.
- 3.2. The Price Factors outlined in Section 7 and the Revenue Credits described in Section 8 will be applied to those costs and credits allocated to the Municipal Water Customers. The Price Factor amounts charged to any one Municipal Water Customer will contain a fair share portion of the costs of operation, maintenance, repair and replacement of the Base Water Facilities; and, a fair share portion of the costs of construction, operation, maintenance, repair and replacement of the Drinking Water Treatment Facilities. The Revenue Credits are also prorated to assure a fair distribution. Attachment 1 of this Ordinance presents a summary of how the Industrial/Municipal cost allocation, Price Factors and Revenue Credits work.
- 3.3. The costs of operating, maintaining, repairing and replacing HBMWD's retail water system are included in the overall Industrial/Municipal cost structure outlined herein. HBMWD's retail customers pay rates that assure recovery of all such costs. The revenues collected from retail customers are credited to the Municipal Water Customers in accordance with the provisions of Section 8 (Revenue Credits) herein. Industrial Water Customers are credited via contract using the same principles. This approach assures that Industrial Water Customers and Municipal Water Customers do not subsidize the retail system.

### 4. Base Water Facility Cost Proration

4.1. The costs of operating (excluding power for pumping), maintaining, repairing and replacing HBMWD's Base Water Facilities; and, maintaining reasonable reserves therefor, have been apportioned, by HBMWD, between the Industrial Water System and Municipal Water System (see Section 3) using a commodity/demand type of methodology. Costs were allocated on the basis of historical use or intent, peak demand or average use depending on the specific cost element being prorated. The resulting allocation at July 1, 1999 is established at 63% for the Industrial Water System and 37% for the Municipal Water System. HBMWD will review this proration prior to the beginning of every fifth fiscal year starting with the fiscal year which marks the fifth anniversary of the adoption of this Ordinance 16; and, in consultation with all Municipal Water Customers and Industrial Water Customers, HBMWD will adjust the percentage allocation to reflect then current conditions. The resulting allocation at

- July 1, 2004, following the first review at the fifth fiscal year, is established at 45% for the Industrial Water System and 55% for the Municipal Water System. Due to the lack of industrial customers, the allocation at July 1, 2017 is established at 100% Municipal Water System.
- **4.2.** The prorated share for the Municipal Water System, derived via this percentage allocation, will be further divided among all Municipal Water Customers using Price Factors 2 and 4, described in Section 7.
- 4.3. The prorated share for the Industrial Water System, derived via this percentage allocation, will be further divided among all Industrial Water Customers via contract.
- 5. <u>Drinking Water Treatment Facilities Cost Proration</u> -- The costs of constructing, operating, maintaining, repairing and replacing HBMWD's DWTF; and, maintaining reasonable reserves therefor, will be allocated only to Municipal Water Customers via the Price Factors 1, 2, and 4 outlined in Section 7.
- 6. Pumping Power The costs of power for pumping water will be apportioned, by HBMWD, between the Industrial Water System and the Municipal Water System based on metered electrical use at HBMWD's pumping facility. The Industrial Water Customers shall pay the portion of HBMWD's actual monthly electricity costs to pump water into the Industrial Water System. The Municipal Water Customers shall pay the portion of HBMWD's actual monthly electricity costs to pump water into the Municipal Water System. The resulting allocation of the MWC pumping power costs shall be distributed to individual MWC's via Price Factor 3 outlined in Section 7.

### 7. Price Factors

### 7.1. Price Factor 1 (DWFP Debt Service)

- 7.1.1. Each Municipal Water Customer shall pay HBMWD, each year, a proportionate share of the payments of principal and interest (if any) on the SRF loan used to construct the DWFP.
- 7.1.2. Such proportionate share shall be determined by multiplying the annual payment required by a fraction, the numerator of which is a specific MWC's Moving Five-Year Average water use, and the denominator of which is the sum of the Moving Five-Year Average water use of all MWC's. HBMWD will bill each MWC 1/12<sup>th</sup> of their Price Factor 1 charges each month.
- 7.1.3. SRF loans require the establishment and maintenance of a reserve equal to one year's debt service. HBMWD will fund this SRF Reserve in accordance with the provisions of Section 7.1.6 (DWFP Reserve). HBMWD will use any amount remaining in the SRF Reserve to pay

7.1.6.4. Any remaining principal and interest in the DWFP Reserve shall be used to proportionally reduce the obligations each MWC will otherwise bear under Price Factor 1.The timing of such reduction shall be determined by HBMWD.

### 7.2. Price Factor 2 (Operations/Maintenance/Capital Costs)

- 7.2.1. Each Municipal Water Customer shall pay a proportionate share of the monthly net operating, maintenance and capital costs obligated or paid for the Base Water Facilities. The Municipal Water Customers' share of Base Water Facility costs shall be as determined in Section 4. Net costs for the Base Water Facility means the operating, maintenance and capital costs minus applicable Revenue Credits as outlined in Section 8. Additionally, each Municipal Water Customer shall pay a proportionate share of the monthly operating, maintenance, repair, replacement and capital costs obligated or paid for the Drinking Water Treatment Facilities.
- 7.2.2. Each Municipal Water Customer shall pay a proportionate share of the monthly net operating, maintenance and capital costs obligated or paid for the Base Water Facilities. The proportionate share of the BWF for each MWC, shall be determined by a fraction, the numerator of which is the customer's Peak Rate Allocation, and the denominator of which is the sum of the Peak Rate Allocation of all MWC's.
  - 7.2.2.1. Effective July 1, 2006, each MWC's Peak Rate Allocation shall be established as reflected in Attachment 2.
  - 7.2.2.2. The proportionate share of the BWF that each MWC pays may be adjusted periodically as set forth herein. The Peak Rate Allocation shall be reviewed, and may be adjusted by HBMWD. effective July 1, 200917, and subsequently every fifth anniversary thereafter (e.g. July 1, 201422). Such review shall be done in consultation with the MWCs. Any adjustment to a MWC's Peak Rate Allocation shall be determined by HBMWD based one of the following conditions: 1) a request by a MWC to increase its Peak Rate Allocation to accommodate increased peak water use due to a new customer and/or actual or planned growth, or 2) a request by a MWC to decrease its Peak Rate Allocation to accommodate reductions in peak water use due to the addition of a water storage reservoir or implementation of water conservation measures. HBMWD reserves the right to deny a request for an increase in a MWC's Peak Rate Allocation if HBMWD no longer has capacity to deliver the requested increase.
  - 7.2.2.3. In addition, at the beginning of any fiscal year, HBMWD may increase the Peak Rate Allocation of a MWC if that MWC has understated its required Peak Rate Allocation, based on

recorded historical peak daily use. Such adjustment may only be done after consultation with the affected MWC.

- 7.2.3. Each Municipal Water Customer shall also pay a proportionate share of the monthly operating, maintenance, repair, replacement and capital costs obligated or paid for the Drinking Water Treatment Facilities. The proportionate shares of Drinking Water Treatment Facilities costs shall be determined by a fraction, the numerator of which is a specific MWC's Moving Five-Year Average water use, and the denominator of which is the sum of the Moving Five-Year Average water use of all MWC's.
- 7.2.4. In order to avoid monthly fluctuations in Price Factor 2 charges, HBMWD will bill/credit MWC's, each month, 1/12<sup>th</sup> of Price Factor 2 related costs/Revenue Credits as reflected in the budget adopted for any given fiscal year. Within 90 days of the end of the fiscal year, HBMWD will calculate the actual Price Factor 2 costs/Revenue Credits for that fiscal year. If actual Price Factor 2 charges are higher than the total of the flat monthly billings, the excess charges will be added, in even monthly installments, as a surcharge to the following fiscal year's Price Factor 2 charges. If actual Price Factor 2 charges are less than what was billed throughout the fiscal year, a refund credit, in even monthly installments, will be added to the following fiscal year's Revenue Credits.
- 7.2.5. The maximum aggregate amount of capital costs that can be charged, to IWC's and MWC's in any given fiscal year under this Price Factor 2 is 2% of the undepreciated property, plant and equipment value shown in HBMWD's annual audit. HBMWD will update its Capital Improvement Plan every five years, beginning in 2017. HBMWD will provide a draft of the updated plan to the MWC's by January 15, for their review and comment. HBMWD will provide the final update of its Plan to MWC's no later than February 28, for their use in budget planning and analysis and updates of water rates.
- 7.2.6. Individual capital projects estimated to cost more than \$200,000 may be charged out in increments under this provision up to three years in advance of the project even though no actual charges are obligated or paid. Before any such advance charges are levied, the projects must be included in HBMWD's capital improvement plan and have Board approval for implementation. Funds collected in this manner will be held and accounted for in a separate reserve, and any interest earned will be applied toward the specific project for which the funds were collected. In the event a project, for which money has been collected, is cancelled; those funds including interest will be refunded, on the same basis as they were charged, within 90 days of the end of the fiscal year in which the project was cancelled.

- **16.4.**Attachments 1, 2, 3 and 4 to this Ordinance 16 are incorporated herein by reference.
- **16.5.** Nothing contained in this Ordinance, or in any contract executed pursuant to this Ordinance, shall limit HBMWD's authority under Water Code section 350 et. seq. to adopt equitable regulations and restrictions to conserve water during a drought or other water shortage emergency.
- 17. Severability If any section, sentence, clause or phrase of this Ordinance is for any reason held to be invalid by a court of competent jurisdiction, such decision shall not affect the validity of the remaining provisions of this Ordinance, provided however that the Board of Directors of HBMWD may amend this Ordinance to correct such invalidity if such action can be taken without materially impairing the rights of any parties to contracts executed pursuant to it, and provided further that said Board may rescind this Ordinance if, in the judgment of the Board, the court decision of partial invalidity renders it impossible or impractical to enforce any of the remaining material terms of this Ordinance.
- 18. Effective Date of Ordinance This revised Ordinance 16 shall become effective as of July 1, 200617 or after adoption by the HBMWD Board of Directors, whichever occurs later.

January 5, 2017

Subject:

Appointment of Officers and Committee Members

At the January Board meeting, the election/appointment of officers and committee members occurs. The following is a summary of required and discretionary actions that are on the agenda for your January 12<sup>th</sup> meeting.

### a. Election/Appointment of Officers

Attached for your information is Section 5 of the Board's Governance manual that addresses the internal organization of the District (These requirements were taken from the pertinent sections of the California Water Code).

- 1. President The Board must elect from its members a President in January of odd-numbered years. Since this is an odd-numbered year, an election is required.
- Vice-President You may elect a Vice-President at any meeting. If the
  President is absent or unable to act, the Vice-President would exercise the powers of the
  President.
- 3. Appointment of Other Officers The Board may appoint other officers at any time.

### b. Appointment of Committee Members

Attached for your information is Appendix E of your Governance manual that lists the officer and committee assignments as they existed last year, as well as the committee charters. Each is briefly discussed below.

### 1. Other Appointments:

- ➤ ACWA Region 1 –no Director is currently on the Board
- ACWA-JPIA Board Director Rupp is currently on the Board and Director Hecathorn and General Manager Helliker are the alternates.
- JPIA Employee Benefits Committee- Director Rupp is on the Committee.
- > JPIA Finance Committee-Director Rupp is on the Committee
- > RCEA Board Director Woo is on the Board and Director Hecathorn is the alternate.
- RREDC Board Director Rupp is on the Board and Director Hecathorn is the alternate.

### 2. Appointments by Others:

- ➤ LAFCO This is an elected position no Board members are on the commission.
- > ACWA-JPIA Executive Committee- Director Rupp was elected to the committee.

> Eureka Oversight Committee - Director Rupp is serving on the Committee. The Committee has or will soon be completing its work and will be dissolved.

### 3. HBMWD Committees:

- ➤ Audit Committee This is a standing committee comprised of the Secretary/Treasurer and one additional Board member. Director Woo is serving as the second Board member.
- Water Task Force This is an ad-hoc committee comprised of one Board/Council member and one management representative from the District and each of the Municipalities. The Task Force is convened on an as needed basis to address items of significance for the regional water system. The President has served as our Board representative and the General Manager as our staff representative. Director Laird is currently serving as the alternate Board representative.
- Water Resource Planning-Instream Flow Committee This is an ad-hoc committee to support planning and assessment work to determine the feasibility of an instream flow dedication in the Mad River. The committee is composed of two Board members, appointed by the President (with the consent of the majority of the Board) and the General Manager. Directors Laird and Woo are on the committee.
- Water Resource Planning-Transport Committee This is an ad-hoc committee to assist with market research, assessment, and identification of potential agencies/districts which may be viable candidates for a water transfer in accordance with the District's Term Sheet for Transfer of Water. The committee is composed of two Board members, appointed by the President (with the consent of the majority of the Board) and the General Manager. Directors Rupp and Hecathorn are on the committee.
- Board Policy and Evaluations Committee- This is an ad-hoc committee to review the Board Policy Manual; the evaluation process for the General Manager and Legal Counsel; and assist the Board in making any changes to improve the manual and evaluation process. The committee is composed of the Board President and one additional member who is nominated by the President and approved by the Board. Director Rupp is serving as the second Board member.

### Section 5 Internal Organization - Officers and Employees

### Section 5.1 - Election of president; vice president

At its first meeting in the month of January of each odd-numbered year, the board must elect one of its members president. The board may at any meeting elect one of its members vice president. If the president is absent or unable to act, the vice president shall exercise the powers of the president.

### Section 5.2 - Appointment of officers

The board will appoint, by a majority vote, a secretary, treasurer, attorney, general manager, and auditor, and shall define their duties and fix their compensation. The board may at any meeting appoint a assistant secretary and assistant treasurer. Each of these hall serve at the pleasure of the board. The board may consolidate the offices of secretary and treasurer.

### Section 5.3 - Employment of employees

The board may employ additional employees as it deems necessary to efficiently maintain and operate the district.

### Section 5.4 - President and secretary

The president and secretary, in addition to the duties imposed on them by law, will perform such duties as may be imposed on them by the board.

#### Section 5.5 - Treasurer

The treasurer, or other persons as may be authorized by the board, will draw checks to pay demands when such demands have been audited and approved in the manner prescribed by the board.

### Section 5.6 - General Manager

Subject to the approval of the Board of Directors, the General Manager has:

- (a) full charge and control of the construction, maintenance, and operation, of the water system,
- (b) full power and authority to employ and discharge all employees and assistants (other than the officers referred to in Section 5.2 above) and prescribe their duties, and fix their compensation. The general manager will also perform other duties as prescribed by the board.

### Section 5.7 - Legal advisor

The attorney will be the legal adviser of the district and will perform other duties as may be prescribed by the board.

### Section 5.8 – Committees

The Board may create committees, either standing or ad-hoc, and prescribe their duties and authority. Prior to appointment of board members to any committee, the President shall initiate a discussion to answer any questions about the purpose of the committee, and to assess board members' interest and availability to serve on that committee. Following such discussion, the President shall nominate board members to serve on the committee, following which the Board shall approve the nomination(s). No more than two board members may serve on the same committee.

Appendix E contains a listing of the District's current officers, other appointments, and the current committee members and charters.

(Water Code Section 71273 and Section 71340 and following)

Updated Position Description - Electrician and Instrument Technician

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

As you are aware, Lee Dedini will be retiring during 2017. As approved in the current budget, there will be an overlap period to provide training of Lee's replacement. So, staff is initiating the search process now.

Attached is a draft updated position description for the Electrician and Instrument Technician position. The changes are noted in red. These changes more accurately reflect the duties of the Electrician and Instrument Technician.

### Recommendation:

Staff recommends approval of the updated job description to more accurately reflect the current duties assigned.

SECTION T3, PAGE NO. 2

### Humboldt Bay Municipal Water District

### **ELECTRICIAN and INSTRUMENT TECHNICIAN**

### **GENERAL PURPOSE**

Under general supervision, installs, maintains, troubleshoots, repairs, adjusts, and calibrates a variety of electrical, electronic, and electro-mechanical equipment including millivolt systems through high voltage distribution systems, SCADA system equipment, PLC ladder logic programming, wireless communications systems, hydroelectric power generation equipment, water pumps, cranes, and telemetry systems; and performs other related duties as required.

### **ESSENTIAL FUNCTIONS AND DUTIES**

- Installs electrical circuits, relays, switch gear, wiring, electronic alarms, and telemetering equipment used in the operation and monitoring of high voltage distribution systems, hydroelectric power generation plant, water pumps, cranes, and telemetry systems.
- 2. Troubleshoots, repairs, and calibrates water treatment instrumentation, testing, and monitoring devices.
- 3. Troubleshoots, programs, and repairs automated control devices; repairs, adjusts, and replaces electrical relays.
- 4. Troubleshoots, repairs, rebuilds, and adjusts electrical and mechanical parts of pumps, motors, and pressure control valves.
- 5. Tests and repairs cathodic protection systems.
- 6. Performs testing, maintenance, and repair on metering and recording instruments, control apparatus, data logging and display equipment, communications and telemetering systems, and laboratory equipment; performs specialized maintenance and repair on two-way FM base radio stations, repeaters, mobile stations, portable and telemetry stations, antennas, and intercom systems.
- 7. Installs, maintains, repairs, and modifies office and shop electrical systems in District office and shop facilities.
- 8. Maintains, troubleshoots the District's SCADA system, sensors, communications devices, PLCs, etc.
- 9. Collaborates with others and performs PLC ladder logic programming, using Allen Bradley equipment and Rockwell Automation software.
- 7-10. Installs, maintains, and troubleshoots wireless radio communications systems.
- 8,11. Oversees the work of helpers assisting in -repairs with repairs.
- 9.12. May order parts, materials, and supplies required for electrical and other repairs.
- 40-13. Reads and interprets manuals, blueprints, and schematic drawings; maintains records and reports of work performed; prepares schematic drawings and updates blueprints to reflect as-built conditions.

### REQUIRED KNOWLEDGE, SKILLS, and ABILITES

- Principles and practices of electrical and electronic repair and maintenance.
- Repair, maintenance, and operational adjustment procedures for water pumping, distribution, and treatment plant equipment.

- Methods, materials, tools, and testing equipment used in the installation, maintenance, calibration, and repair of electrical and electronic equipment.
- Measuring, monitoring, and calibration devices used in electrical, mechanical, instrumentation, and relay troubleshooting and repair.
- Repair and calibration of instrumentation and relays.
- Maintenance and repair of electrical generation equipment, and high voltage (12,000 volt) transmission system
- Experience with operation, maintenance, and troubleshooting of Supervisory Control and Data Acquisition Systems.
- Experience with the programming of PLCs and HMIs and the associated programming software such as Rockwell Automation's Studio 5000, RSview32, Factory Talk, Logix500, and ControlLogix5000.
- Experience with wired and wireless telemetry technologies and the troubleshooting and maintenance methods employed with them.
- Experience with project development, specification and interconnection CAD work associated with the implementation of new equipment and/or control technologies.
- Safety laws, regulations, and rules relating to electrical system and electronic maintenance and repair work. Safe work practices including necessary electrical clearances and lockout/tagout procedures.
- Operation of computers, automated equipment and standard applications software
- Cooperative working relationships. Teamwork to effectively solve practical problems, and coordinate work among a small, close-knit workforce.

### TRAINING AND EXPERIENCE:

Any combination of training and experience that provides the required knowledge and abilities is qualifying. A typical way to obtain the requisite knowledge and abilities would be:

- o High school diploma or GED
- o Community College, technical or other course work relevant for this position beneficial
- Three-to-five years of journey-level experience in electrical and electronic construction, repair and maintenance, preferably with some direct experience at a water or wastewater treatment plant, hydro-electric plant, or similar facilities. Completion of a formal apprenticeship or its equivalent in the electrical, electronics, or instrumentation fields are highly desirable.
- o Grade II Treatment and/or Distribution certificates

### SPECIAL REQUIREMENTS

- Must possess the category of California Driver's license required by the State Department of Motor
  Vehicles to perform the essential duties of the position. Job incumbents must maintain a driving record
  acceptable to the District and its insurance carrier. Compliance with these requirements and established
  District vehicle operation standards are a condition of continuing employment.
- 2. May work odd shifts, weekends, or holidays and perform standby duties as assigned. Must be available to respond to emergencies which affect the District such as earthquakes, power outages, pipeline breaks, high water events, and chlorine leaks.
- 3. Must be clean-shaven in order to wear respiratory protection or other safety equipment. Must be able to participate in confined space operations.

SECTION F3 PAGE NO. 4

- 4. Must possess and maintain a Grade II Water Treatment Operator's Certificate and a Grade II Water Distribution Certificate pursuant to State drinking water regulations. If an incumbent does not initially possess this level of certification, the District will allow a period of time for the incumbent to obtain the required certifications. Job incumbents must also meet the State's continuing education requirements to maintain certifications. Compliance with the State certification requirements is a condition of continuing employment.
- 5. Must acquire basic American Red Cross First Aid/CPR certificates during the initial year of employment.

### **ESSENTIAL PHYSICAL ABILITIES**

Persons selected for appointment to this position must pass a pre-employment medical examination which the District pays for. Because this position <u>is</u> considered "safety sensitive" in nature, the person selected for appointment to this position must pass a pre-employment drug screening which the District also pays for. The medical examination and drug screening is intended to evaluate the applicant's ability to meet the physical and health requirements for this classification.

A person employed in this position must be able to:

- a) sit for extended periods of time;
- b) operate a desktop computer;
- c) operate motor vehicles and other equipment;
- d) operate a variety of hand and electric tools;
- e) perform a variety of physical activities which may involve reaching, bending, squatting, kneeling, crouching, crawling, and climbing, and also manual dexterity;
- f) perform additional physical activities to position or move tools, equipment, and supplies which may involve lifting, and pushing or pulling motions;
- g) wear a respirator and other personal protective equipment;
- h) understand and carry out oral and written directions;
- i) communicate well with others, verbally and in writing;
- j) work cooperatively and get along well with other people;
- investigate and solve complex problems which involves ability to perform visual inspections, ability to hear normal versus abnormal noises, ability to view and respond to operational control screens including alarms, and ability to think critically.
- read and understand complex electrical diagrams and communicate electrical processes contained in such diagrams;
- k)m) Draw rudimentary electronic diagrams and communicate electrical processes contained in such diagrams.

### Resolution No. 2017-02

Resolution of the Humboldt Bay Municipal Water District Board of Directors for the Quagga/Zebra Mussel Infestation Prevention Fee Grant Program Application and Funding Agreement 2016-17

- WHEREAS, prior to the State of California Parks and Recreation, Division of Boating and Waterways approving an Application and executing a Funding Agreement, the Humboldt Bay Municipal Water District (HBMWD) Board of Directors is required to pass a resolution authorizing a designated representative to execute said Application, Funding Agreement, amendments, and certifications, designating a representative to approve claims for reimbursement, designating a representative to sign the Funding Request and Project Status, designating a representative to sign Project Completion Certification, and designating a representative to sign the Contractor's Release Form; and
- WHEREAS, HBMWD and its implementing agency Ruth Lake CSD, have the authority to construct, operate, and maintain the Ruth Lake Marina and boat launches; and make an application to the State of California Parks and Recreation, Division of Boating and Waterways for grant funding in the amount of \$63,500 under the Harbors and Watercraft Revolving Fund for the Quagga and Zebra Mussel Infestation Prevention Grant Program 2016-17; and
- WHEREAS, the HBMWD desires to enhance, modify or rebuild facilities and supplies restricting lake access as outlined in the existing Prevention Plan for Quagga and Zebra Mussels at Ruth Lake; and
- WHEREAS, by the HBMWD accepted application the HBMWD will adopt a project budget totaling \$63,500; and
- WHEREAS, by the HBMWD that, pursuant and subject to all of the terms and provisions of the Harbors and Watercraft Revolving Fund program, application be made to the State of California Parks and Recreation, Division of Boating and Waterways for funding.
- NOW, THEREFORE, BE IT RESOLVED the General Manager, and the Business Manager, of the HBMWD are hereby authorized and directed to cause the necessary data to be prepared and application to be signed and filed with the State of California Parks and Recreation, Division of Boating and Waterways;

BE IT FURTHER RESOLVED, that General Manager and Business Manager are hereby authorized to sign the State of California Parks and Recreation, Division of Boating and Waterways, Harbors and Watercraft Revolving Fund program Funding Agreement and any amendments thereto; and

BE IT FURTHER RESOLVED, that the General Manager and Business Manager are hereby authorized to approve Claims for Reimbursement under the State of California Parks and Recreation, Division of Boating and Waterways, Harbors and Watercraft Revolving Fund program; and

BE IT FURTHER RESOLVED, that the General Manager and Business Manager are hereby authorized to execute the Budget and Expenditure Summary for the State of California Parks and Recreation, Division of Boating and Waterways, Harbors and Watercraft Revolving Fund program; and

BE IT FURTHER RESOLVED, that the General Manager and Business Manager are hereby authorized to sign the Contractor's Release Form for the State of California Parks and Recreation, Division of Boating and Waterways, Harbors and Watercraft Revolving Fund program; and

BE IT FURTHER RESOLVED, that the General Manager and Business Manager are hereby authorized to certify that the project is complete and ready for final inspection.

### **Humboldt Bay Municipal Water District** SECTION IS PAGE NO. 2 **Subrecipient Assurances**

### **Hazard Mitigation Grants**

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact California Governor's Office of Emergency Services (Cal OES). Further, certain federal assistance awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

### As the duly authorized representative of Humboldt Bay Municipal Water District (the applicant) I certify that the applicant:

- 1. Has the legal authority to apply for federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
- 2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the state, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the assistance; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
- 3. Will not dispose of, modify the use of, or change the terms of the real property title, or other interest in the site and facilities without permission and instructions from the awarding agency. Will record the federal interest in the title of real property in accordance with awarding agency directives and will include a covenant in the title of real property acquired in whole or in part with federal assistance funds to assure nondiscrimination during the useful life of the project.
- 4. Will comply with the requirements of the assistance-awarding agency with regard to the drafting, review and approval of construction plans and specifications.
- 5. Will provide and maintain competent and adequate engineering supervision at the construction site to ensure that the complete work conforms with the approved plans and specifications and will furnish progress reports and such other information as may be required by the assistance awarding agency or state.
- 6. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
- 7. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gains.
- Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et 8. seq.), which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

- 9. Will comply with all federal statues relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683 and 1685-1686) which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794) which prohibit discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101-6107) which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 93-255) as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention. Treatment and Rehabilitation Act of 1970 (P.L. 91-616) as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for federal assistance is being made, and (i) the requirements on any other nondiscrimination statute(s) which may apply to the application.
- 10. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provides for fair and equitable treatment of persons displaced or whose property is acquired as a result of federal and federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of federal participation in purchases.
- 11. Will comply with the flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is \$5,000 or more.
- 12. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.O. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved state management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of federal actions to State (Clean Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.O. 93-205).
- Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) 13. related to protecting components or potential components of the national wild and scenic rivers system.

SECTION IS

- 14. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and preservation of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).
- 15. Will comply with Standardized Emergency Management (SEMS) requirements as stated in the California Emergency Services Act, Government Code, Chapter 7 of Division 1 of Title 2, Section 8607.1(e) and CCR Title 19, Sections 2445, 2446, 2447 and 2448.
- 16. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984 and the Single Audit Act Amendments of 1996.
- 17. Will comply with all applicable requirements of all other federal laws, Executive Orders, regulations and policies governing this program.
- Has requested through the State of California, federal financial assistance to be used to 18. perform eligible work approved in the subgrantee application for federal assistance. Will, after the receipt of federal financial assistance, through the State of California, agree to the following:
  - a. The state warrant covering federal financial assistance will be deposited in a special and separate account, and will be used to pay only eligible costs for projects described above;
  - b. To return to the State of California such part of the funds so reimbursed pursuant to the above numbered application, which are excess to the approved actual expenditures as accepted by final audit of the federal or state government.
  - c. In the event the approved amount of the above numbered project application is reduced, the reimbursement applicable to the amount of the reduction will be promptly refunded to the State of California.
- 19. Will not make any award or permit any award (subgrant or contract) to any party which is debarred or suspended or is otherwise excluded from or ineligible for participation in Federal assistance programs under Executive Order 12549 and 12689, "Debarment and Suspension."

The undersigned represents that he/she is authorized by the above named subgrantee to enter into this agreement for and on behalf of said subgrantee.

The undersigned represents that he/she is authorized by the subgrantee to enter into this agreement for and on behalf of the said subgrantee.

OF OLION THE LANGE MO. I	SECTION ILO	PAGE NO. /	
--------------------------	-------------	------------	--

### Resolution of the Humboldt Bay Municipal Water District Recognizing and Honoring the Outstanding Service of Aldaron Laird

- WHEREAS, Aldaron Laird has served the Humboldt Bay Municipal Water District with distinction, as Director of Division Five, from January 2007 to January 2017; and,
- WHEREAS, his service has included President from January 2013 to January 2015; Vice-President from January 2015 to January 2017; and,
- WHEREAS, he served the District in many ways beyond the normal duties of a Director, including serving on the Joint Agency Aquatic Invasive Species Committee, the Water Task Force, the Water Resources Planning Instream Flow Committee; and,
- WHEREAS, he represented HBMWD and the Humboldt Bay area in general for a number of years on the Region 1 Board of Directors of the Association of California Water Agencies, both as vice-chair and chair, and also on the Board of Directors of the Association as a whole,
- WHEREAS, he was an instrumental leader in the Tap the Mad/Drink Local Water campaign in Humboldt County that involved the District and its seven Municipal Customers; and,
- WHEREAS, he built on the strong foundation he created through his authorship of the District's Habitat Conservation Plan with his ongoing environmental leadership and valuable contributions to policy deliberations, especially with respect to fisheries and forestry topics, climate change impacts such as sea level rise, and much, much more; and,
- WHEREAS, the Board wishes to acknowledge his departure from the Board and does hereby wish him all the best,
- NOW, THEREFORE BE IT RESOLVED, that the Board and Staff of the Humboldt Bay Municipal Water District does hereby sincerely and gratefully acknowledge Aldaron Laird's contributions and years of dedicated service.
- BE IT FURTHER RESOLVED, that the Board and Staff of the Humboldt Bay Municipal Water District thank Aldaron Laird and his wife Christy, for the years of service he contributed to the District and the Humboldt Bay Community.
- PASSED, APPROVED AND ADOPTED this 12th day of January 2017, by the following roll call vote:

Subject:

Notification of Subapplication Approval for Phase One

Hazard Mitigation Grant Program

FEMA-4240-DR-CA, Project #0054, FIPS #023-91000

Dear Mr. Helliker:

The California Governor's Office of Emergency Services (Cal OES) received notification that the Federal Emergency Management Agency (FEMA) has approved your organization's Phase One Subaward application in the amount of \$133,125.00. A copy of the FEMA award package is enclosed for your records.

In order to receive payment, all subrecipient must have a current (within the last 3 years), valid Governing Body Resolution and updated Grant Assurances on file with our office (sample copies enclosed). These forms may be downloaded in an electronic format at <a href="www.caloes.ca.gov">www.caloes.ca.gov</a> following the links: Cal OES Divisions; Recovery; Disaster Mitigation & Technical Support; 404 Hazard Mitigation Grant Program; HM Post Obligation Documents. Please complete the electronic forms and the enclosed "Supplemental Grant Subaward Information" sheet and return them to the address below within 30 Days. Payments will be made on a reimbursement basis using the Hazard Mitigation Reimbursement Form. A ten percent (10%) retention will be withheld from all reimbursement payments and will be released as part of the subgrant closeout process.

Reimbursements can be made for only items listed on the approved subaward application; expenditures for any other work should be separately maintained and are the sole responsibility of the subrecipient. Any funds received in excess of current needs or approved amounts, or those found owed as a result of a final inspection or audit must be refunded to the State within 30 days of receipt of an invoice from Cal OES.

Please read all enclosed documents prior to initiating the approved project. For further assistance please contact the Hazard Mitigation Grants at (916) 845-8150.

Subject: Interest Apportionment Rate and Other Considerations

December 1, 2016

Honorable Board Members,

Your fund balances in the County Treasury from July through September 2016 (Fiscal 16/17 1st Quarter) earned an annualized interest rate of 1.07%. For comparison purposes, the LAIF (Local Agency Investment Fund) rate was 0.60%.

The Federal Reserve is meeting on December 14<sup>th</sup> and it is very likely that a rate increase will be announced at that time. The certainty of an increase has been growing because economic data is showing the best quarter of growth since 2014. In addition rates have been rising because Investors have pulled money from the U.S. bond market on speculation that Donald Trump's victory in the presidential election will pave the way for increased fiscal stimulus which will drive up inflation.

The main topic of conversation relative to the treasury pool has been policy changes under President Elect Donald Trump; while at the same time excluding emotionally driven speculation ranging from fear to elation about what is going to happen. The central thesis emerging has been that new policies will be inflationary, will increase government debt, but should strengthen the economy. We believe the Fed is headed toward higher interest rates but how high and how quickly will only be known after the fact and will depend on how the economy performs after the new administration's policies are put into place. Until those policies take effect we are stuck with the markets speculative reaction to changes that may or may not come to fruition. Time will tell.

The goal of this office, as always, is safety of the public's money while generating as much yield as possible in current market conditions once all liquidity requirements are met. We will diligently continue with that objective in mind.

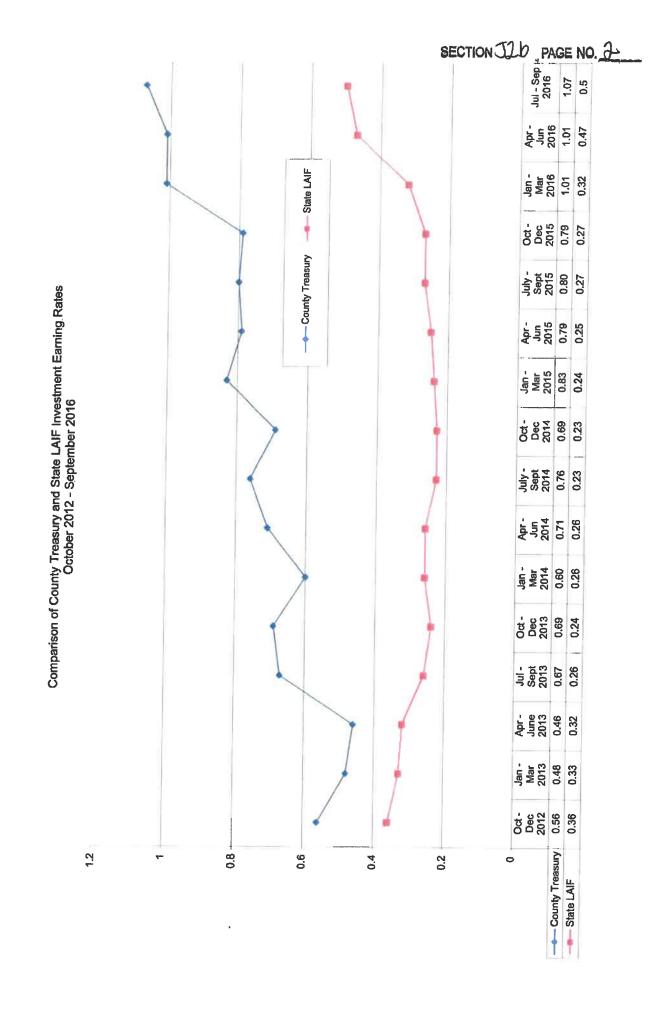

Let us know how we may be of service.

Sincerely,

ohn Bartholomew
Freasurer-Tax Collector

Humboldt County Treasury Team: Amy Christensen

#### **Humboldt Bay Municipal Water District**

To:

**Board of Directors** 

From:

John Friedenbach

Date:

January 4, 2017

Subject:

**Update to Procedures for Requisitions** 

\*\*\*\*\*\*\*\*\*\*\*\*

#### **BACKGROUND**

The current procedures for Requisitions, Purchase Orders, and Short-Form Contracts has been in existence since the year 2000. There are some areas in the current procedures that should be updated. Specifically they are:

- Purchase level authority
- Delegation of authority
- Emergency purchases
- Credit Card purchases

The current purchase level authority is set at \$750 for the Superintendent. General Manager approval is required for purchases in excess of \$750. Authority levels for purchases should be set based on a balance between operating efficiency needs and financial internal controls to safeguard District assets. Given the levels of our annual operating budget, approximately \$11M, and the operating needs of our water system, the following authority levels are proposed for consideration:

Board of Directors	over \$30,000
General Manager	\$30,000
Superintendent	\$ 5,000
Business Manager	\$ 5,000
<b>Operations Supervisor</b>	\$ 2,500
Maintenance Supervisor	\$ 2,500

The delegation of authority is utilized to ensure continuing operating efficiency in the absence of a particular approval level individual. The following delegation hierarchy is proposed:

General Manager may delegate to either the Superintendent or Business Manager.

Superintendent may delegate to either the Operations or Maintenance Supervisor.

Emergency purchases are required in those situations that require immediate acquisition of materials and supplies to address non-normal circumstances and situations of dire consequence to the operations of the District. As such, delegation of authority should be authorized to purchase whatever is deemed necessary to respond to and remedy the emergency situation.

#### RECOMMENDATION

To improve operating efficiency and to clearly delineate purchasing authority levels and delegation of authority levels, staff is recommending that the attached Procedures for Requisitions, Purchase Orders, and Short-Form Contracts be adopted effective immediately.

#### **HUMBOLDT BAY MUNICIPAL WATER DISTRICT**

#### Procedures for Requisitions, Purchase Orders, and Short-Form Contracts

#### I) PURPOSE

The purpose of this policy is to: outline procedures for requisitions, purchase orders, and short-form contracts; and each process surrounding the identified documents; and support the District's efforts to implement and adhere to strong internal accounting and operational controls.

Requisitions and Purchase Orders (POs) commit the District to the procurement of District materials, supplies and equipment. Each document identifies the purpose, department, and individual requesting the purchase. This allows the proper accounting for item(s) purchased, and facilitates budgetary controls.

Short-Form Contracts secure outside services (often referred to as force-account assistance); outlining the scope of service to be provided. The General Manager shall approve all Short-Form Contracts. Contracts ensure the appropriate legal protections are available for Construction, Non-Construction, and Professional Services. Short-Form Contracts may be used for work that is contracted out directly by District staff versus contract work requiring coordination with our District engineers.

With respect to construction work, Short-Form Contracts may only be used for projects of less than \$35,000. Generally speaking, the Construction Services contract should be used when the activity being undertaken requires a contractor's license or technical professional services.

#### II) AUTHORITY

The Operations and Maintenance Supervisors each have authority to approve material, supply and equipment purchases up to \$2,500 under normal operating circumstances. The Superintendent and Business Manager each have the authority to approve material, supply and equipment purchases up to \$5,000 under normal operating circumstances. The General Manager shall approve all material, supply, and equipment purchases over \$5,000 and up to \$30,000. The Board of Directors shall approve all material, supply, and equipment purchases over \$30,000. The Superintendent, Business Manager and General Manager are responsible for ensuring all purchases and service contracts are consistent with the approved budget.

**Delegation.** During temporary absences, the General Manager may delegate purchasing authority to the Superintendent or Business Manager. During temporary absences, the Superintendent may delegate purchasing authority to the Operations or Maintenance Supervisors.

**Emergencies** dictate delegation of authority to purchase whatever is deemed necessary to respond to and remedy the emergency situation.

#### III) PROCEDURES

Approval for all purchases and service contracts must be obtained from the Superintendent or General Manager or the delegated supervisor or manager. It is ideal to request authority in advance however, it is understood circumstances vary. At the least, authority must accompany the purchase order or invoice prior to payment.

#### a) Requisition and POs

Method 1: A completed Requisition (with the appropriate approvals) shall be submitted to the Eureka office in advance of the purchase. The Eureka office will then issue a PO to the vendor to initiate the purchase.

Method 2: If a purchase is necessary right away, a PO number may be obtained from the Eureka office in advance of a completed Requisition. The completed requisition follows the order noting that it is "Confirming" (indicating that the PO itself does not need to be sent to the vendor to initiate the purchase).

Attached is the Requisition form which must be completed for each purchase. To the greatest extent possible, itemize the purchase and include the price for each item. Include the appropriate PO number, Special Job number (if pertinent) and whether the item is being funded via a line item in the approved Project Budget. Briefly describe the reason for the purchase.

If materials, supplies or equipment are expected to cost greater than \$1,000, and if they are readily available from several vendors, informal bids should be obtained to ensure the District is getting a competitive price. If the materials/supplies are less than \$1,000, and/or if the items are specialized or unique and not available from multiple vendors, a sole source purchase may be made. If informal bids are obtained, record the results on the back side of the Requisition Form.

Once the material, equipment or supplies are received, the packing slips and/or charge tags should be forwarded to the Eureka office immediately. They must be signed and dated by the person receiving or checking in the merchandise to ensure the order is filled and all items received.

#### Credit Card purchases:

Purchases that are paid with a District credit card are subject to the same PO and Requisition form process. The credit card charge receipt issued at time of purchase must be attached to the Requisition form submittal.

#### b) Short-Form Contracts

Submit a draft of the appropriate Short-Form Contract to the Eureka Office. Include the contractor's proposal or bid, a description of the services to be provided, the completion date, the price, and any other pertinent information. Provide an example of the required insurance documents to the vendor.

The vendor must submit a Certificate of Insurance demonstrating the required coverages, and an Additional Insured Endorsement naming the "Humboldt Bay Municipal Water District, its directors, officers, employees, or authorized volunteers" as additional insured in the policy.

A fully executed Short-Form Contract and the necessary insurance documents must be completed and in hand before any contract work commences. Once the contractor has completed the full scope of work under the contract, the Accounting & HR Specialist must be notified that the contract is complete and payment may be made.

#### IV) ATTACHMENTS

- 1: Requisition Form
- 2: Purchase Order
- 3: Sample Short-form Contracts (for Construction, Non-construction, and Professional Services)
- 4: Sample Insurance Documents

Contractor or supplier (Contractor), agrees with Member Water District that:

- a) To the fullest extent permitted by law, Contractor will immediately defend, indemnify and hold harmless Member Water District, its directors, officers, employees, or authorized volunteers from all claims and demands of all persons arising out of the performance of the work or the furnishing of materials; including but not limited to, claims by the Contractor or Contractor's employees for damages to persons or property except for the sole negligence or willful misconduct of Member Water District, its directors, officers, employees, or authorized volunteers. Contractor shall immediately defend upon the Member Water District's tender, at Contractor's own cost, expense and risk, any and all such aforesaid suits, actions or other legal proceedings of every kind that may be brought or instituted against Member Water District, its officials, officers, agents, employees and representatives, notwithstanding whether Contractor's liability is or can be established Contractor's obligation to indemnify shall not be restricted to insurance proceeds, if any received by Member Water District, or its directors, officers, employees, or authorized volunteers.
- b) By his/her signature hereunder, Contractor certifies that he/she is aware of the provisions of Section 3700 of the Labor Code which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and he/she will comply with such provisions before commencing the performance of the work of this agreement. Contractor and subcontractors will keep workers' compensation insurance for their employees in effect during all work covered by this agreement.

#### SAMPLE INSURANCE PROVISIONS

Disclaimer: This is a sample only and its provisions may or may not be applicable to your particular project or contract. The legal requirements may also change over time. You should consult with your risk manager and/or legal counsel before finalizing any sample provision.

c) Commercial General Liability and Automobile Liability Insurance - The Contractor shall provide and maintain the following commercial general liability and automobile liability insurance:

**Coverage -** Coverage for commercial general liability and automobile liability insurance shall be at least as broad as the following:

- Insurance Services Office (ISO) Commercial General Liability Coverage (Occurrence Form CG 0001)
- 2. Insurance Services Office (ISO) Business Auto Coverage (Form CA 0001), covering Symbol 1 (any auto)

Limits - The Contractor shall maintain limits no less than the following:

- 1. General Liability Two million dollars (\$2,000,000) per occurrence or the full per occurrence limits of the policies available, whichever is greater for bodily injury, personal injury and property damage. If Commercial General Liability Insurance or other form with a general aggregate limit or products-completed operations aggregate limit is used, either the general aggregate limit shall apply separately to the project/location (via ISO endorsement at least as broad as the ISO CG 2503, or ISO CG 2504, provided to Member Water District) or the general aggregate limit and products-completed operations aggregate limit shall be twice the required occurrence limit.
- Automobile Liability One million dollars (\$1,000,000) for bodily injury and property damage each accident limit and shall cover all owned, non-owned, and hired automobiles.

Required Provisions - The general liability and automobile liability policies are to contain, or be endorsed to contain, the following provisions:

1. Member Water District, its directors, officers, employees, and authorized volunteers are to be given insured status (via ISO endorsement at least as broad as CG 2010 1185 or both CG 20 10 and CG 20 37 04 13 forms (if later revisions used) as respects: liability arising out of activities performed by or on behalf of the Contractor; products and completed operations of the Contractor; premises owned, occupied or used by the Contractor; and automobiles owned, leased, hired or borrowed by the Contractor. The coverage shall contain no special limitations on the scope of protection afforded to Member Water District, its directors, officers, employees, or authorized volunteers.

- 2. For any claims related to this project, the Contractor's insurance shall be primary insurance as respects Member Water District, its directors, officers, employees, or authorized volunteers using the ISO CG 20 01 04 13 or coverage at least as broad. Any insurance, self-insurance, or other coverage maintained by Member Water District, its directors, officers, employees, or authorized volunteers shall not contribute to it.
- 3. Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to Member Water District, its directors, officers, employees, or authorized volunteers.
- 4. The Contractor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.
- 5. Each insurance policy required above shall provide that coverage shall not be canceled, except with notice to the Member Water District.

Such liability insurance shall indemnify the Contractor and his/her sub-contractors against loss from liability imposed by law upon, or assumed under contract by, the Contractor or his/her sub-contractors for damages on account of such bodily injury (including death), property damage, personal injury, completed operations, and products liability.

All of the insurance shall be provided on policy forms and through companies satisfactory to Member Water District.

**Deductibles and Self-Insured Retentions -** Any deductible or self-insured retention must be declared to and approved by <u>Member Water District</u>. At the option of <u>Member Water District</u>, the insurer shall either reduce or eliminate such deductibles or self-insured retentions. Policies containing any self-insured retention (SIR) provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named or additional insureds, co-insurers, and/or insureds other than the First Named Insured.

Acceptability of Insurers - Insurance is to be placed with insurers having a current A.M. Best rating of no less than A-:VII or equivalent or as otherwise approved by Member Water District.

Evidences of Insurance - Prior to execution of the agreement, the Contractor shall file with Member Water District a certificate of insurance (Acord Form 25 or equivalent) signed by the insurer's representative evidencing the coverage required by this agreement. Such evidence shall include an additional insured endorsement signed by the insurer's representative. Such evidence shall also include confirmation that coverage includes or has been modified to include Required Provisions 1-5. In the event that the Contractor employs other contractors (sub-contractors) as part of the work covered by this agreement, it shall be the Contractor's responsibility to require and confirm that each sub-contractor meets the minimum insurance requirements specified above. Failure to continually satisfy the Insurance requirements is a material breach of contract.

d) If any of the required coverages expire during the term of this agreement, the Contractor shall deliver the renewal certificate(s) including the general liability additional insured endorsement to Member Water District at least ten (10) days prior to the expiration date. The Contractor shall, upon demand of Member Water District, deliver to Member Water District such policy or policies of insurance and the receipts for payment of premiums thereon.

- e) Contractor shall not accept direction or orders from any person other than the General Manager or the person(s) whose name(s) is (are) inserted on Page 1 as "other authorized representatives."
- f) Payment, unless otherwise specified on Page 1, is to be \_\_\_\_\_days after acceptance by Member Water District.
- g) Permits required by governmental authorities will be obtained at Contractor's expense, and Contractor will comply with applicable local, state and federal regulations and statutes including but not limited to Cal/OSHA requirements.
- h) Any change in the scope of the work to be done, method of performance, nature of materials or price thereof, or any other matter materially affecting the performance or nature of the work will not be paid for or accepted unless such change, addition or deletion is approved in advance, in writing by a supplemental agreement executed by Member Water District. Contractor's "authorized representative(s)" has (have) the authority to execute such written change for Contractor.

Note: This model language is for informational purposes only. It is designed to be used as a guide to the District and its legal counsel in drafting sound risk transfer provisions. The actual drafting of these provisions should be done in consultation with the District's legal counsel. Changes are highlighted

Contractor or supplier (Contractor), agrees with Member Water District that:

Indemnification: To the fullest extent permitted by law, Contractor will immediately defend, indemnify and hold harmless Member Water District, its directors, officers, employees, or authorized volunteers (collectively the District) from all claims and demands of all persons arising out of or in connection with this Contract or the performance of the work or the furnishing of materials; including but not limited to, claims by the Contractor or Contractor's employees for damages to persons or property except for the sole negligence or willful misconduct or active negligence of Member Water District, its directors, officers, employees, or authorized volunteers. Contractor shall immediately defend upon the Member Water District's tender, at Contractor's own cost, expense and risk, any and all such aforesald suits, actions or other legal proceedings of every kind that may be brought or instituted against Member Water District, its officials, officers, agents, employees and representatives, notwithstanding whether Contractor's liability is or can be established; Contractor's obligation to indemnify shall survive the termination or completion of this agreement for the full period of time allowed by law and shall not be restricted by the insurance requirements of this Contract or to insurance proceeds, if any received by Member Water District, or its directors, officers, employees, or authorized volunteers.

#### SAMPLE INSURANCE PROVISIONS

Disclaimer: This is a sample only and its provisions may or may not be applicable to your particular project or contract. The legal requirements may also change over time. You should consult with your risk manager and/or legal counsel before finalizing any sample provision.

**Workers' compensation Coverage**: By his/her signature hereunder, Contractor certifies that he/she is aware of the provisions of Section 3700 of the California Labor Code which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and he/she will comply with such provisions before commencing the performance of the work of this agreement. Contractor and sub-contractors will keep workers' compensation insurance for their employees in effect during all work covered by this agreement.

**Commercial General Liability and Automobile Liability Insurance -** The Contractor shall provide and maintain the following commercial general liability and automobile liability insurance:

**Coverage -** Coverage for commercial general liability and automobile liability insurance shall be at least as broad as the following:

- Insurance Services Office (ISO) Commercial General Liability Coverage (Occurrence Form CG 0001)
- Insurance Services Office (ISO) Business Auto Coverage (Form CA 0001), covering Symbol 1 (any auto)

Limits - The Contractor shall maintain limits no less than the following:

- General Liability Two million dollars (\$2,000,000) per occurrence or the full per occurrence limits of
  the policies available, whichever is greater for bodily injury, personal injury and property damage and
  products & completed operations liability. If Commercial General Liability Insurance or other form with
  a general aggregate limit or products-completed operations aggregate limit is used, either the general
  aggregate limit shall apply separately to the project/location (via ISO endorsement at least as broad as
  the ISO CG 2503, or ISO CG 2504, provided to Member Water District) or the general aggregate limit
  and products-completed operations aggregate limit shall be twice the required occurrence limit.
- Automobile Liability One million dollars (\$1,000,000) for bodily injury and property damage each
  accident limit.
- 3. Excess Liability The limits of Insurance required in this agreement may be satisfied by a combination of primary and umbrella or excess Insurance. Any umbrella or excess Insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and non contributory basis for the benefit of the District (if agreed to in a written contract or agreement) before the District's own primary or self Insurance shall be called upon to protect it as a named insured.

SECTION J2C PAGE NO. 13

Required Provisions - The general liability and automobile liability policies are to contain, or be endorsed to contain, the following provisions:

- 1. Member Water District, its directors, officers, employees, and authorized volunteers are to be given insured status at least as broad as ISO endorsement CG 2010 11 85; or both CG 20 10 and CG 20 37 04 13 (or the 20 10 04 13 (or earlier edition date) specifically naming all of the District parties required in this agreement, or using language that states "as required by contract"). All Subcontractors hired by Contractor must also have the same forms or coverage at least as broad; as respects liability arising out of activities performed by or on behalf of the Contractor; products and completed operations of the Contractor; premises owned, occupied or used by the Contractor; and automobiles owned, leased, hired or borrowed by the Contractor. The coverage shall contain no special limitations on the scope of protection afforded to Member Water District, its directors, officers, employees, or authorized volunteers.
- For any claims related to this project, the Contractor's Insurance shall be primary insurance as respects
  Member Water District, its directors, officers, employees, or authorized volunteers using the ISO CG 20 01
  04 13 or coverage at least as broad. Any insurance, self-insurance, or other coverage maintained by
  Member Water District, its directors, officers, employees, or authorized volunteers shall not contribute to it.
- Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to <u>Member Water District</u>, its directors, officers, employees, or authorized volunteers.
- 4. The Contractor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.
- 5. Each insurance policy required above shall provide that coverage shall not be canceled, except with notice to the Member Water District.

Such liability insurance shall indemnify the Contractor and his/her sub-contractors against loss from liability imposed by law upon, or assumed under contract by, the Contractor or his/her sub-contractors for damages on account of such bodily injury (including death), property damage, personal injury, completed operations, and products liability.

The automobile liability policy shall cover all owned, non-owned, and hired automobiles.

All of the insurance shall be provided on policy forms and through companies satisfactory to Member Water District.

Deductibles and Self-Insured Retentions - Any deductible or self-insured retention must be declared to and approved by Member Water District. At the option of Member Water District, the insurer shall either reduce or eliminate such deductibles or self-insured retentions. Policies containing any self-insured retention (SIR) provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named or additional insureds, co-insurers, and/or insureds other than the First Named Insured.

Acceptability of Insurers - Insurance is to be placed with insurers having a current A.M. Best rating of no less than A:VII or equivalent or as otherwise approved by Member Water District.

Evidences of Insurance - Prior to execution of the agreement, the Contractor shall file with Member Water District a certificate of insurance (Acord Form 25 or equivalent) signed by the insurer's representative evidencing the coverage required by this agreement. Such evidence shall include (1) attached additional insured endorsements with primary & non-contributory wording, (2) Workers' Compensation waiver of subrogation, and (3) a copy of the CGL declarations or endorsement page listing all policy endorsements, and confirmation that coverage includes or has been modified to include Required Provisions 1-5 above. The District reserves the right to obtain complete, certified copies of all required insurance policies, at any time. Contractor shall maintain the Insurance required by this agreement for a period of not less than 10 years following the termination or completion of this agreement. Contractor further waives all rights of subrogation under this agreement. Failure to continually satisfy the Insurance requirements is a material breach of contract.

If any of the required coverages expire during the term of this agreement, the Contractor shall deliver the renewal certificate(s) including the general liability additional insured endorsement to Member Water District at least ten (10) days prior to the expiration date. Failure to comply with any of the Insurance requirements shall

constitute a material breach of contract. The Insurance requirements in this agreement do not in any way represent or imply that such coverage is sufficient to adequately cover the Contractor's obligations under this agreement. All Insurance or self-insurance coverage and limits applicable to a given loss or available to the named insured shall be available and applicable to the additional insured. The insurance obligations under this agreement are independent of and in addition to the defense and indemnity obligations contained elsewhere in this agreement and shall not in any way act to limit or restrict the defense or Indemnity or additional insured obligations of the Contractor or the Contractor's insurance carrier, and shall be for (1) the full extent of the Insurance or self-insurance coverages and limits carried by or available to the Contractor, or (2) the minimum Insurance coverage and amounts shown in this agreement; whichever is greater. District reserves the right to add such other parties as may be required in the future to the indemnity and additional insured requirements of this agreement.

Contractor shall not accept direction or orders from any person other than the General Manager or the person(s) whose name(s) is (are) inserted on Page 1 as "other authorized representatives."

Payment, unless otherwise specified on Page 1, is to be \_\_\_\_\_days after acceptance by Member Water District,

**Safety:** Contractor must obtain all applicable Division of Occupational Safety and Health (CAL-OSHA) permit(s) and others required by California Labor Code and California Government Code, prior to the initiation of any practices, work, method, operation, or process related to the work covered in the contract. Permits required by governmental authorities will be obtained at Contractor's expense.

In the performance of this contract the contractor shall comply with all applicable, including but not limited to, Federal, State and local laws governing safety, health and sanitation related to their scope of work and operations. In case of conflict in regulations, the most stringent shall apply. The contractor shall provide all safeguards, safety devices and protective equipment and take any other needed actions necessary to protect the life and health of employees on the job and the safety of the public and to protect property in connection with the performance of the work covered by the contract. It is a condition of this contract, and shall be made a condition of each subcontract which the contractor enters into pursuant to this contract, that the contractor and any subcontractor shall not permit any employee, in performance of the contract, to work in surroundings or under conditions which are unsanitary, hazardous or dangerous to his/her health or safety, as determined under Cal/OSHA safety and health standards.

Any change in the scope of the work to be done, method of performance, nature of materials or price thereof, or to any other matter materially affecting the performance or nature of the work will not be paid for or accepted unless such change, addition or deletion is approved in advance, in writing by a supplemental agreement executed by Member Water District. Contractor's "authorized representative(s)" has (have) the authority to execute such written change for Contractor.

Note: This model language is for informational purposes only. It is designed to be used as a guide to the District and its legal counsel in drafting sound risk transfer provisions. The actual drafting of these provisions should be done in consultation with the District's legal counsel. Changes are highlighted.

## Model Agreement-Professional Services (With General & Auto Liability Exposures With Additional Insured Endorsement) Member Water District

### Address Telephone (XXX) XXX-XXXX - FAX (XXX) XXX-XXXX

Some of the important terms of this agreement are printed on Page 2 & 3. For your protection, make sure that you read and understand all provisions before signing. The terms on Page 2 & 3 are incorporated in this document and will constitute a part of the agreement between the parties when signed.

Title	Title
Other authorized representative(s):	Other authorized representative(s):

- a. When the law establishes a professional standard of care for the Consultant's services, to the fullest extent permitted by law, Consultant will immediately defend, indemnify and hold harmless Member Water District, its directors, officers, employees, and authorized volunteers from all claims and demands of all persons that arise out of, pertain to, or relate to the Consultant's negligence, recklessness, or willful misconduct in the performance (or actual or alleged non-performance) of the work under this agreement. Consultant shall defend itself against any and all liabilities, claims, losses, damages, and costs arising out of or alleged to arise out of Consultant's performance or non-performance of the work hereunder, and shall not tender such claims to Member Water District nor to its directors, officers, employees, or authorized volunteers, for defense or indemnity.
- b. Other than in the performance of professional services, to the fullest extent permitted by law, Consultant will immediately defend, indemnify and hold harmless Member Water District, its directors, officers, employees and authorized volunteers from all claims and demands of all persons arising out the performance of the work or furnishing of materials; including but not limited to, claims by the Consultant or Consultant's employees for damages to persons or property except for the sole negligence or willful misconduct or active negligence of Member Water District, its directors, officers, employees, or authorized volunteers.
- c. Workers' Compensation: By his/her signature hereunder, Consultant certifies that he/she is aware of the provisions of Section 3700 of the California Labor Code which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and that Consultant will comply with such provisions before commencing the performance of the professional services under this agreement. Consultant and sub-consultants will keep workers' compensation insurance for their employees in effect during all work covered by this agreement.
- d. Professional Liability: Consultant will file with Member Water District, before beginning professional services, a certificate of insurance satisfactory to Member Water District evidencing professional liability coverage of not less than \$1,000,000 per claim and \$2,000,000 annual aggregate, that coverage shall not be cancelled except with notice to Member Water District. Coverage is to be placed with a carrier with an A.M. Best rating of no less than A-:VII, or equivalent, or as otherwise approved by Member Water District. The retroactive date (if any) is to be no later than the effective date of this agreement. Consultant shall maintain such coverage continuously for a period of at least five (5) years after the completion of the contract work. Consultant shall purchase a five-year extended reporting period i) if the retroactive date is advanced past the effective date of this Agreement; ii) if the policy is canceled or not renewed; or iii) if the policy is replaced by another claims-made policy with a retroactive date subsequent to the effective date of this Agreement. In the event that the Consultant employs other consultants (subconsultants) as part of the work covered by this agreement, it shall be the Consultant's responsibility to require and confirm that each sub-consultant meets the minimum insurance requirements specified above.
- e. Consultant will file with <u>Member Water District</u>, before beginning professional services, certificates of insurance (Acord Form 25 or equivalent) satisfactory to <u>Member Water District</u> evidencing

**Coverage -** Coverage for commercial general liability and automobile liability insurance shall be at least as broad as the following:

- 1. Insurance Services Office (ISO) Commercial General Liability Coverage (Occurrence Form CG 0001)
- Insurance Services Office (ISO) Business Auto Coverage (Form CA 0001), covering Symbol 1 (any auto)

Limit - The consultant shall maintain limits no less than the following

- General liability coverage of not less than two million (\$2,000,000) per occurrence or the full per occurrence limits of the policies available, whichever is greater for bodily injury, personal injury and property damage; (\$4,000,000 general and products-completed operations aggregate (if used)).
- Auto liability One million dollars \$1,000,000 for bodily Injury and property damage each accident limit;
- 3. Workers' compensation (statutory limits) and employer's liability (\$1,000,000) (if applicable);

#### Required Provisions -

- The general liability coverage shall give Member Water District, its directors, officers, employees (collectively the District), and authorized volunteers insured status (via ISO endorsement at least as broad as 'CG 2010 1185 or both CG 20 10 plus CG 20 37 if a later editions is used) specifically naming the Member Water District, its directors, officers, employees, or authorized volunteers; or using the language that states "as required by written contract."
- The general liability coverage is to state or be endorsed (with as broad as ISO endorsement CG 20 01 04 13) to state "such insurance shall be primary and any insurance, self-insurance or other coverage maintained by Member Water District, its directors, officers, employees, or authorized volunteers shall not contribute to It".
- Coverage is to be placed with a carrier with an A.M. Best rating of no less than A-:VII, or equivalent, or as otherwise approved by Member Water District.
- The coverage shall contain no special limitations on the scope of protection afforded to Member Water District, its directors, officers, employees, or authorized volunteers.
- In the event that the Consultant employs other consultants (sub-consultants) as part of the
  work covered by this agreement, it shall be the Consultant's responsibility to require and
  confirm that each sub-consultant meets the minimum insurance requirements specified
  above.
- Evidences of Insurance Prior to execution of the agreement, the Consultant shall file with Member Water District a certificate of insurance (Acord Form 25 or equivalent) signed by the insurer's representative evidencing the coverage required by this agreement. Such evidence shall include (1) attached additional insured endorsements with primary & non-contributory wording, (2) Workers' Compensation waiver of subrogation, and (3) a copy of the CGL declarations or endorsement page listing all policy endorsements, and confirmation that coverage includes or has been modified to include Required Provisions above. The District reserves the right to obtain complete, certified copies of all required insurance policies, at any time. Consultant shall maintain the Insurance required by this agreement for a period of not less than 5 years following the termination or completion of this agreement. Consultant further waives all rights of subrogation under this agreement. Failure to continually satisfy the Insurance requirements is a material breach of contract.
- f. If any of the required coverages expire during the term of this agreement, the Consultant shall deliver the renewal certificate(s) including the general liability additional insured endorsement to Member Water District at least ten (10) days prior to the expiration date.
- g. Consultant shall not accept direction or orders from any person other than the General Manager or the person(s) whose name(s) is (are) inserted on Page 1 as "other authorized representative(s)."
- h. Payment, unless otherwise specified on Page 1, is to be \_\_\_\_\_days after acceptance by Member Water District.
- Permits required by governmental authorities will be obtained at Consultant's expense, and Consultant will comply with applicable local, state, and federal regulations and statutes including Cal/OSHA requirements.
- j. Any change in the scope of the professional services to be done, method of performance, nature of materials or price thereof, or to any other matter materially affecting the performance or nature of the professional services will not be paid for or accepted unless such change, addition or deletion is approved in advance, in writing by a supplemental agreement executed by <a href="Member Water District">Member Water District</a>. Consultant's "authorized representative(s)" has (have) the authority to execute such written change for Consultant.

THE HUMBOLDT BAY MUNICIPAL WATER DISTRICT OFFICIALS, OFFICERS, EMPLOYEES, VOLUNTEERS P.O. BOX 95 EUREKA CA 95501

This is to certify that we have issued a valid Worker's Compensation insurance policy in a form approved by the California Insurance Commissioner to the employer named below for the policy period indicated.

This policy is not subject to cancellation by the Fund except upon 30 days advance written notice to the employer.

We will also give you 30 days advance notice should this policy be cancelled prior to its normal expiration.

This certificate of insurance is not an insurance policy and does not amend, extend or alter the coverage afforded by the policy listed herein. Notwithstanding any requirement, term or condition of any contract or other document with respect to which this certificate of insurance may be issued or to which it may pertain, the insurance afforded by the policy described herein is subject to all the terms, exclusions, and conditions, of such policy.

**Board of Directors** 

From:

John Friedenbach

Date:

January 4, 2017

Subject:

Cal-Card Credit Cards for Operations & Maintenance Supervisors

\*\*\*\*\*\*\*\*\*\*\*\*\*\*

#### **BACKGROUND**

As you may recall, in September 2015 the Board authorized switching the District credit cards to the Cal-Card system administered by US Bank. Currently, the General Manager, Superintendent and Business Manager have District credit cards. The limits on the cards are: \$50,000; \$50,000; \$10,000 respectively.

Purchases made using the Cal-Card are governed by the District's internal accounting controls as delineated in the Procedures for Requisitions, Purchase Orders, and Short-Form Contracts. Typical purchases are currently made for: computer software, training, conferences, securing lodging and airfare for ACWA, CSDA, AWWA and other training events, materials, supplies and small tools.

#### CREDIT CARDS FOR MAINTENANCE AND OPERATIONS SUPERVISORS

The Maintenance and Operations Supervisors routinely secure goods and services for the daily operations of the District. In addition, they often travel for required training. There have been challenges in obtaining authorization by the Superintendent due to work commitments to utilize his District credit card for certain purchases. The addition of individual credit cards assigned to the Maintenance and Operations Supervisors will eliminate these delays and improve operational efficiency.

#### **RECOMMENDATION**

Authorize the addition of two District credit cards to the Cal-Card system. One will be assigned to the Maintenance Supervisor and one will be assigned to the Operations Supervisor. The credit limits will be \$2,500 for each card. Staff is recommending authorization of two additional cards to provide redundant purchasing ability when the needs arise so District operations are not impacted.

## Operations

Memo to: HBMWD Board of Directors From: Dale Davidsen, Superintendent

Date: January 5, 2017

Subject: Essex/Ruth December 2016 Operational Report

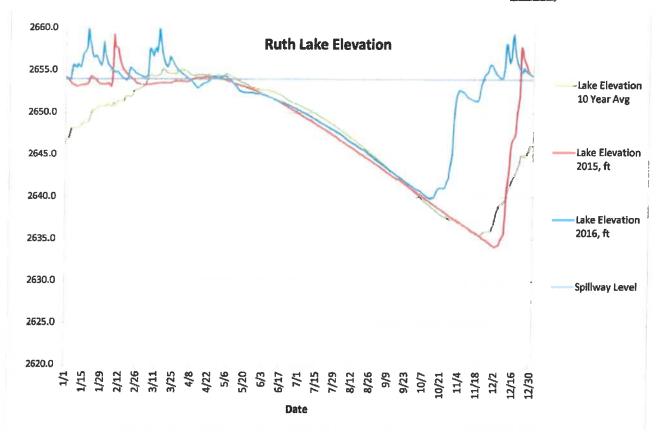

#### Ruth Lake, Upper Mad River and Hydro Plant

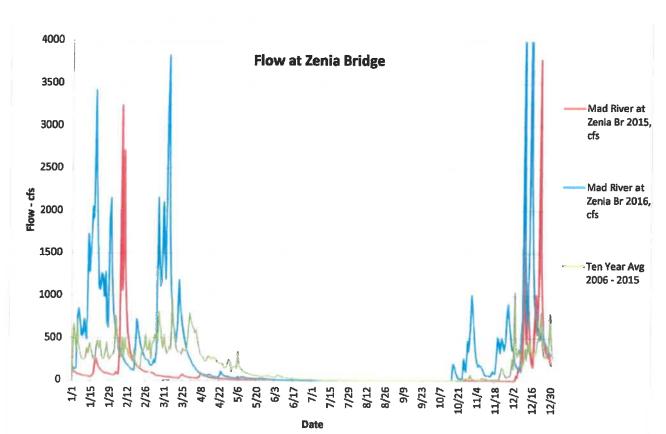

- 1. The high flow at Mad River above Ruth Reservoir (Zenia Bridge) during the month was measured on December 15<sup>th</sup> at 6,300 cfs and the low flow was measured on December 7<sup>th</sup> at 116 cfs.
- 2. The conditions at Ruth Lake in December were as follows:
  - a. The lake level on December 31st was 2654.41 feet which is:
    - 1. 1.06 feet lower than November 30th, 2016
    - 2. 0.03 feet higher than December 31st, 2015
    - 3. 7.32 feet higher than the ten year average
    - 4. 0.41 feet over the spillway
- 3. We measured 13.10 inches of rain at Ruth Headquarters during the month with a high reading of 3.65 inches measured on December 15<sup>th</sup>.
- 4. Ruth hydro power production was 979,800 kWh during the month with 1 shutdown and 1720 KWh lost power.
- 5. The high discharge flow from the lake this month was 4386 cfs on December 15<sup>th</sup> and the low release flow from the lake was 245 cfs on December 6<sup>th</sup>.

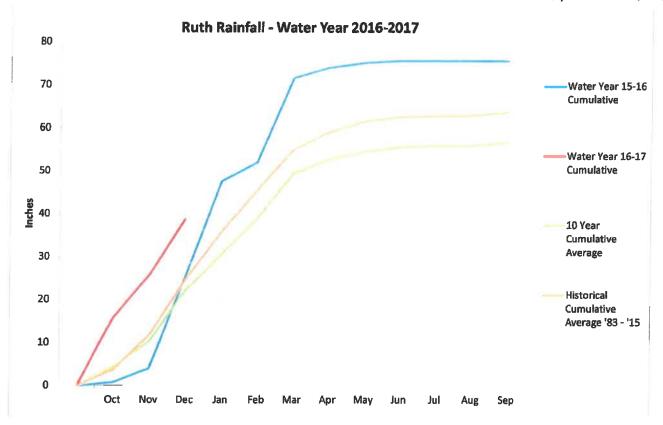

#### Winzler Control, TRF and Lower Mad River

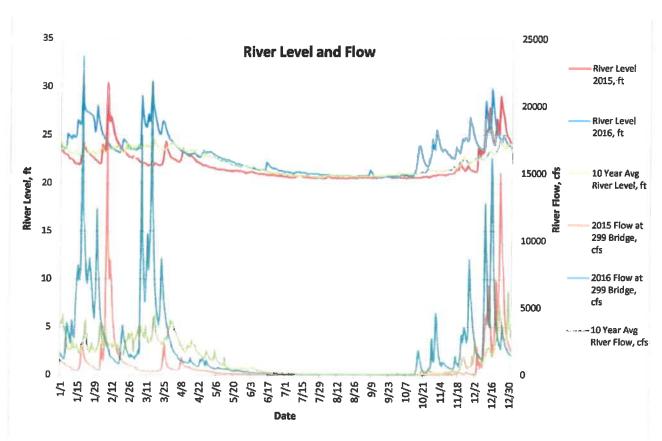

- 6. The river at Winzler Control Center reached a high recorded flow of 22,700 cfs and a level of 31.6 feet on December 15<sup>th</sup>. The low river flow was on December 7<sup>th</sup> with a flow of 1140 cfs and a level of 23.6 feet.
- 7. The domestic water conditions for November were as follows:
  - a. The monthly turbidity average was 0.03 NTU, which meets Public Health Secondary Standards.
  - b. We metered 233,209 million gallons at an average of 7.523 MGD.
  - c. The maximum metered daily municipal customer use was 8.197 MGD on December 8<sup>th</sup>.
- 8. The Turbidity Reduction Facility ran 31 days in December. The conditions were as follows:
  - a. Filtered water production was 246.791 million gallons.
  - b. Average monthly source water turbidity was 1.40 NTU.
  - c. Average monthly filtered water turbidity was 0.05 NTU.

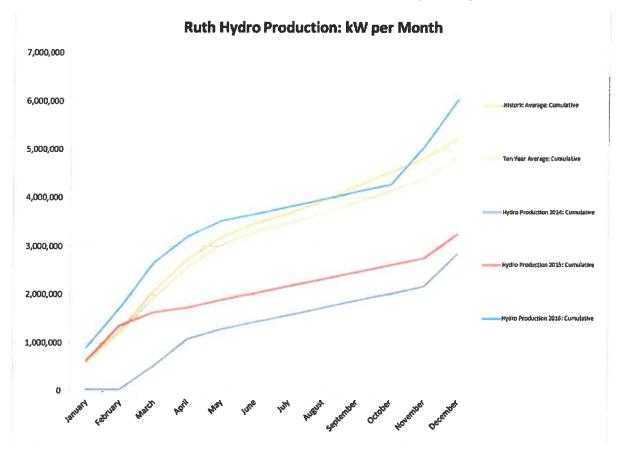

- 9. December 2<sup>nd</sup> I met with Ridgeline Enterprises at Ruth Headquarters to get estimate for Hazardous Tree Removal
- 10. December 5th-6th Telstar was on site doing CL2 system and Analyzer maintenance.
- 11. December 7th Safety meeting SCBA (Self-Contained Breathing Apparatus) Donning & Doffing.
- 12. December 8<sup>th</sup> M6.5 Earthquake off the Coast Caused numerous calls from FERC and other agencies. Brian did not feel it at Ruth but due to the size and attention it drew I had him do an inspection of the dam and complete report.
- 13. December 13th Met with Nate (GHD) and a contractor at the 1 Mg reservoir to answer questions on Reservoir Roof replacement project.
- 14. December 14<sup>th</sup> Weir pump failed at Ruth, Maintenance went up to troubleshoot and ordered repair parts.
- 15. Notable, Ongoing & Current projects
  - a. Collector 1 1A lateral replacement
  - b. Fieldbrook Communications upgrade
  - c. Arcata intertie Radio Link to SCADA
  - d. Samoa Wireless Communications Project
  - e. TRF Security

Memo to: Board of Directors

SECTION J3C, PAGE NO.

From: Dale Davidsen, Superintendent

Date: January 4, 2017

Subject: Hazardous and Dead, Dying, Diseased Trees at Ruth Headquarters

As you may recall, last month I shared two quotes for removal of Hazardous, Dead, Dying and Diseased trees at Ruth Headquarters. These trees pose immediate hazards to individuals and District property at this facility. One quote from Dan Collins Tree Service was for \$80,000 and the other from Ridgeline Enterprise was for \$20,000 with a couple of additional options. Option 1) chip slash onsite add \$2,000 and; Option 2) Haul Logs offsite add \$2,500.

Staff recommends contracting with Ridgeline Enterprise to remove approximately 40-50 selected trees at our Ruth Headquarters, deck the logs onsite for \$20,000 and chip all slash from tree removal onsite for an additional \$2,000 for a total cost of \$22,000, as soon as weather permits. (See updated quote attached)

Since this is not currently a budgeted project, staff recommends paying for this work out of the Maintenance Emergency Repair budget line item. Currently we have spent \$4,590 of the \$50,000 budgeted for emergency repairs. Utilizing this budget line item would leave \$23,410 in the Emergency Repair budget after spending \$22,000 for the hazardous tree removal.

January 6, 2016

#### Proposal

#### RidgeLine Agrees to:

- Perform Dead, Dying, Diseased
  - Remove selected trees
  - Logs to be decked and left on site
  - Slash chipped and left on site
  - Not responsible for damage to grounds due to equipment usage
  - Any reasonably moved property in work area must be moved prior to the start of the project. Water lines in the logging zones need to be rolled back

The price of this contract is for the work described above; any additional work will be billed in addition to this contract with prior approval by customer. Payment must be received in full upon completion of project.

The price of above stated work: \$22,000.000

By signing this contract, customer agrees to have read, understood, and accepted all information included in the customer information sheet. If you have not received a customer information sheet, please contact Ridgeline for a copy.

Re:

Forestry Management - Ruth Lake Buffer Strip

#### Background

The District owns property in and around Ruth Reservoir commonly known at the "Buffer Strip". The Buffer Strip is slightly less than 3,000 acres. See map attached. Much of the Buffer Strip has existing timber. The timber is a mixture of primarily pine with some douglas fir and mixed hardwood. In the past, the District has periodically harvested timber from the Buffer Strip to maintain a healthy forest environment. The last such timber harvest occurred in the late 1990's. As noted in the attached letters from Rhett Imperial, Department of Forestry and Fire Protection (DFFP) area representative, there are significant amounts of dead, dying and diseased trees that exist currently on the Buffer Strip, which need to be addressed. See attached letters dated March 19, 2015, April 18, 2016, and November 21, 2016.

Under the terms of Ordinance 16, any net timber sales revenue is credited to our Municipal customers as a Price Factor 2 credit. Although this could provide some rate relief during the year of a timber harvest, current market conditions are not favorable for the primary species of pine in the buffer strip. Based on informal discussions with the District's Licensed Timber Operator (LTO) concerning our current Dead, Dying and Diseased Exemption Permit, it is questionable whether or not a harvest of the dead trees will produce any net profit to the District.

#### Discussion

Per the Board's request, staff has investigated Timber Management Plans, Timber Harvest Plans and other forestry management options for the Buffer Strip around Ruth Lake. Attached is a summary letter by Dan Graybill of James L Able Forestry Consultants, Inc. which describes various timber management options. Although timber management is not the core purpose of our District, some level of management is necessary to support District operations for a number of reasons. Perhaps most importantly, the presence of dead trees near the reservoir poses a significant risk of such timber being felled in storms and washing into the reservoir, and building up on the log boom. The most important probable failure mode for Matthews Dam analyzed in the recent dam safety analysis is associated with logs and other materials blocking the spillway, thus causing water to flow over the top of the dam and erode the downstream face. Timber management to prevent such a scenario is critical to the operations of the reservoir.

Additionally, water quality can be affected by dead trees falling, creating large soil disturbances that can cause erosion. Active timber management relating to watershed condition is thus important to the District.

#### **Options**

The following is a summary of various timber management mechanisms.

- Timber Management Plan Cost: \$50,000 to \$75,000.
  - TMP's are used to facilitate grant funding and to delineate landowner goals and objectives. Does not authorize harvest of timber. It is more of a planning document.
- Timber Harvest Plan Cost: \$30,000 to \$75,000
  - O Used to delineate terms and conditions of timber harvest. Includes authorization by DFFP to harvest timber.
- Tree Removal Exemption Permits from THP Cost: zero for permit, \$2,500 to \$5,000 annually for Registered Professional Forester (RPF) if desired.
  - Once exemption permit is approved by DFFP, landowner may harvest timber under conditions of exemption permit. Conditions vary by permit type.

#### **Recommendation and Action**

Staff recommends immediately taking action to actively manage timber in the Buffer Strip. We propose using the DFFP Exemption Permits to manage the immediate timber harvest need to address the growing pest infestation and drought impacts which have resulted in large concentrations of dead, dying and diseased trees within the Buffer Strip. This will dramatically lessen the potential hazard of dead trees reaching the spillway in a high water event. The least cost and recommended approach is to utilize the various exemption permits offered by the DFFP. These exemption permits are: 1) Christmas tree; Dead, dying or diseased, fuelwood or split products exemption; 2) Drought Mortality Exemption; 3) Structure Protections Exemption; 4) Utility Right of Way Exemption; 5) Forest Fire Prevention Exemption. These timber harvest exemptions do not require permit fees and they can be managed with minimal cost through the use of a RPF on a limited scope contract.

Forest Property Management

To: Humboldt Bay Municipal Water District

From: James L. Able Forestry Consultants Inc.

Subject: Ruth Lake Reservoir Forest Management

The land surrounding Ruth Lake Reservoir is a complex combination of varying uses and management needs. The uses vary from lease lots to campgrounds to cattle grazing. It is safe to say this poses a certain level of complexity when it comes to managing the timber resources within the ownership. With the numerous objectives that need to be met come a variety of options to attain those goals. After having a chance to examine a portion of the stand I have observed an alarming number of dead and dying Ponderosa Pine trees. The areas I looked at include the area around the HBMWD Headquarters and areas up lake form Hobart Creek on both sides of the channel to the Zenia Bridge. Currently the most pressing issues to deal with are the dead and dying trees and the beetle infestation. The drought stressed trees add to the fuel loading and contribute to the very real probability of sever wildfires. The current conditions are a result of drought, beetle attack, and a lack of proactive forest management. Addressing these forest health issues will also help to address the ongoing fuels management task. This means getting the affected trees out of the stand to curb the insect spread and reduce fuel loading. This would involve filling the appropriate permits with Cal Fire and having an RPF Mark the affected trees for removal. Without action the infestation will continue to grow, exacerbating the existing fire hazard. Following the initial treatment, annual monitoring should take place to identify future problem areas. Identifying forest health concerns on a yearly basis would help to prevent widespread insect and disease outbreak. This yearly monitoring would be relatively inexpensive compared more detailed management options.

Below I have outlined different options ranging in management intensity and cost. It is my opinion that immediate stand management objectives can be met utilizing a combination of permits. Once the immediate problems have been address a longer term approach can be developed.

There are more detailed descriptions to follow but this is our best estimates for our forestry consulting costs for the projects discussed during the meeting on January 3<sup>rd</sup> 2017:

Forestry Consulting costs: Initial treatment: \$20,000.00

Timber Management Plan: \$50,000.00 to \$75,000.00

The Dead and dying exemption can cover the ownership allowing for incidental removal of dead trees. Where the limits of that exemption are exceeded due to volume the Drought Mortality Exemption can be used for larger areas. If additional trees need to be removed around houses or utility lines the appropriate exemptions can facilitate that as well.

Timber management plans can vary greatly depending on what they are needed for and the level of detail required. Below is a general description of what goes into a Timber Management Plan.

#### Timber Management Plan:

The most important thing to take into consideration for a Timber management Plan (TMP) is the purpose. What is the TMP needed for and what is it designed to accomplish? TMPs are often used to facilitate grant funding programs such as CFIP or NRCS grants. Other TMPs simply document a landowners management objectives and provides a guiding document to direct management decisions. Aspects that a TMP typically addresses are:

#### Overview:

- Statement of landowner goals and objectives
- Property maps and ownership descriptions
- Timber inventory and Growth
- Property infrastructure (roads, structures, utilities, fire breaks, drafting sites, fencing etc.)
- Insect and disease inspection, protection and salvage
- Fire protection practices (Fire plan, Fire safe council, Wildland Urban interface planning)
- Timetable for review and update of management plan

#### Stand Description and inventory Data:

The property should be broken into logical management units based on specific site characteristics. Things to consider would be; Stand age and species, stand health, soil type, stocking, site quality, and land use among other considerations.

#### Forest Management activities:

- Timber harvest (Interval and volume)
- Regeneration practices
- Thinning (commercial and pre-commercial)
- Fire safe projects (funding may be available)
- Forest health projects (address insect and disease in the stands)
- Harvest Plan preparation and implementation (THP or NTMP)\*
- Wildlife management (habitat restoration or improvement)
- Water resource protection (Improve and maintain riparian infrastructure)
- Projects to enhance the stand's aesthetics, recreational uses
- Update inventory and growth data as needed
- Maintain plant and animal surveys (endangered plant and animal surveys)

<sup>\*</sup>It should be noted that and Timber Management Plan is not a Timber Harvest Plan. A Timber Harvest Plan (THP) is a permit to harvest timber and should not be confused with a Management Plan. There are

two basic types of permits: Timber Harvest Plans and Non-Industrial Timber Management Plans (NTMP). Both the THP and the NTMP are permits from the state that go through a review process involving numerus state and federal agencies. THPs are good for 7 years and NTMPs (which are more restrictive) are good in perpetuity.

A management plan can offer a wide range of assistance and guidance to a landowner interested in cultivating a desired objective. The initial cost for a TMP is high and the subsequent harvest permits will also be expensive.

Cal Fire has various permits called exemptions. These are for case specific scenarios where it has been determined that the extensive review process is not necessary or is not feasible due to physical, environmental, or safety concerns. These exemptions are fairly restrictive and are not intended for large scale timber harvest operations. Some examples of applicable exemptions are outlined below:

- Christmas tree; Dead, dying or diseased, fuelwood or split products exemption
   This allows for the harvest of up to 10% of the volume per given acre.

   The trees must be dead or dying.
- Drought Mortality Exemption
   This allows for clearing up to 20 acres of dead and dying trees due to drought stress (More acres are possible with the assistance of and RPF).
- Structure Protections Exemption
   This allows for fire hazard removal around inhabited, permitted structures within 300 feet.
   There are retention and slash disposal requirements.
   The trees do not have to be dead or dying.
- Utility Right of Way Exemption
   This allows for the removal of trees around public and private utilities such as power lines
   The trees do not have to be dead or dying
- Forest Fire Prevention Exemption
   This allows for the removal of small trees with the intent to reduce fire danger
   The trees do not have to be dead or dying

#### Cost:

#### Initial Treatment:

This would be to cover the initial treatment of the areas currently showing signs of beetle infestation and tree mortality. This would cover the areas around the HBMWD headquarters and up lake from there. This cost includes Marking, log sale, permitting and logging administration. This figure is a general estimate and can be adjusted with further direction.

-\$20,000.00

Timber Management Plan:

This would cover the constructing of a Management Plan covering the entire ownership. This estimate is intended to give a general idea of what a project of this scale could cost. This figure is a general estimate and can be adjusted with further direction.

-\$50,000.00 to \$75,000.00

Please feel free to contact me with any further questions.

Thank You,

Dan Graybill, RPF #2943

December 12, 2016 Monday, 3:15 p.m.

Redwood Coast Energy Authority will accommodate those with special needs. Arrangements for people with disabilities who attend RCEA meetings can be made in advance by contacting Barbara Garcia at 269-1700 by noon the day of the meeting.

#### I. ROLL CALL

#### **II. REPORTS FROM MEMBER ENTITIES**

#### III. ORAL COMMUNICATIONS

This time is provided for people to address the Board or submit written communications on matters not on the agenda. At the conclusion of all oral & written communications, the Board may respond to statements. Any request that requires Board action will be set by the Board for a future agenda or referred to staff.

#### IV. CONSENT CALENDAR

All matters on the Consent Calendar are considered to be routine by the Board and are enacted on one motion. There is no separate discussion of any of these items. If discussion is required, that item is removed from the Consent Calendar and considered separately. At the end of the reading of the Consent Calendar, Board members or members of the public can request that an Item be removed for separate discussion.

- A. Approve attached Warrants.
- B. Accept attached Financial Reports.

#### V. REMOVED FROM CONSENT CALENDAR ITEMS

Items removed from the Consent Calendar will be heard under this section.

#### VI.OLD BUSINESS

A. RCEA Fiscal Audit Report

Accept RCEA Independent Fiscal Audit Report for the year ending 6/30/14.

**B.** Board Operating Guidelines

Adopt Resolution 2016-4 adopting RCEA Board of Directors Operating Guidelines.

C. Headwaters Fund Loan

Approve Headwaters Fund \$700,000 unsecured, non-revolving line of credit with 5% interest rate, 1% underwriting fee, and 72 month term, and authorize the Executive Director to execute any associated documents and agreements pending final review and approval by RCEA General Counsel.

D. Staffing and Reorganization

Adopt Resolution 2016-5 adopting Compensation Policy, Employee Performance Review Policy, Organization Chart Update, Position Descriptions, and Salary Schedule.

E. Energy Risk Management Policy
Adopt Resolution 2016-6 adopting an Energy Risk Management Policy.

#### VII. NEW BUSINESS

A. Energy Services Companies Request for Qualifications
Approve issuing Request for Qualifications for Energy Service Companies pending final review and approval by RCEA General Counsel.

#### VIII. COMMUNITY CHOICE ENERGY (CCE) BUSINESS (Confirm CCE Quorum)

#### **IX.NEW CCE BUSINESS**

- A. Preparation for January 2017 rate-setting
- B. Community Choice Energy Outreach Update

#### X. ADJOURNMENT

The next regular meeting of the RCEA Board of Directors will be held at 3:15pm on Monday, January 23, 2017, as the 3<sup>rd</sup> Monday of January is a holiday.
